8.	IV B.P.Th.	133

PHYSIOTHERAPY

DEFINITION:

Physiotherapy' is a branch of modern medical science which includes examination, assessment, interpretation, physical diagnosis, planning and execution of treatment and advice to any person for the purpose of preventing, correcting, alleviating and limiting dysfunction, acute and chronic bodily malfunction including life saving measures via chest physiotherapy in the intensive care unit, curing physical disorders or disability, promoting physical fitness, facilitating healing and pain relief and treatment of physical and psychological disorders through modulating psychological and physical response using physical agents, activities and devices including exercise, mobilization, manipulations, therapeutic ultrasound, electrical and thermal agents and electrotherapy for diagnosis, treatment and prevention.

(Definition as per the Maharashtra State Council for Occupational therapy & Physiotherapy, 2004)

'Physiotherapist' is a qualified professional who has acquired all the above mentioned knowledge and skills for entry into practice after being awarded a bachelor degree in the subject of "Physiotherapy" from a recognised institute affiliated to the University conducting a fulltime course not less than four years and six months of internship.

PREAMBLE

Physiotherapy or Physical Therapy (P.T.) is a **Movement Science** with an established theoretical and scientific base and widespread clinical applications in the **Prevention, Restoration & Rehabilitation, Maintenance and Promotion of optimal physical function.** Physiotherapists **diagnose and manage movement dysfunction** and enhance physical and functional abilities. This physical dysfunction may be the sequelae of involvement of any of the systems like Musculoskeletal, Neurological, Cardiovascular, Respiratory or other body systems.

These practitioners contribute to society and the profession through practice, teaching, administration, and the discovery and application of new knowledge about physiotherapy experiences of sufficient excellence and breadth by research to allow the acquisition and application of essential knowledge, skills, and behaviors as applied to the practice of physiotherapy.

Learning experiences are provided under the guidance and supervision of competent faculty, in both, classroom as well as in clinic. The designed curriculum will prepare the entry-to-practice physiotherapist (PT), to be an autonomous, effective, safe and compassionate professional, who practices collaboratively in a variety of healthcare set ups such as neonatal to geriatric, from critical care to community fitness to sports training and is responsive to the current and future needs of the health care system.

<u>VISION</u>: To create a best possible environment to prepare physiotherapist who shall lead to serve & heal in a variety of healthcare and social settings to provide best quality of life to an individual.

<u>MISSION</u>: To graduate **knowledgeable**, **service-oriented**, **self-assured**, **adaptable**, **reflective practitioners** who, by virtue of critical and integrative thinking along with clinical reasoning, lifelong learning, and ethical values, render independent judgments concerning patient /person needs those are supported by evidence; promote the health of the patient or person; and enhance the professional, contextual, and collaborative foundations for physiotherapy practice.

ESSENTIAL REQUIREMENTS

The following "essential requirements" specify those attributes that the faculty consider necessary for completing the professional education enabling each graduate to subsequently enter clinical practice. The purpose of this curriculum is to delineate the cognitive, affective and psychomotor skills deemed essential for completion of this program and to perform as a competent physiotherapist who will be able to evaluate, plan & execute physiotherapy treatment independently.

COGNITIVE LEARNING SKILLS: The student must demonstrate the ability to receive, interpret, remember, reproduce and use information in the cognitive, psychomotor, and affective domains of learning to solve problems, evaluate work, and generate new ways of processing or categorizing similar information listed in course objectives.

PSYCHOMOTOR SKILLS: The student must demonstrate the following skills.

1. Locomotion ability:

Get to lecture, laboratory and clinical locations, and move within rooms as needed for changing groups, partners and work stations. Move quickly in an emergency situation to protect the patient (e.g. from falling).

2. Manual tasks:

- a. Maneuver another person's body parts to effectively perform evaluation techniques. Manipulate common tools used for screening tests of the cranial nerves, sensation, range of motion, blood pressure, e.g., cotton balls, safety pins, goniometers, Q-tips, sphygmomanometer. Safely and effectively guide, facilitate, inhibit, and resist movement and motor patterns through physical facilitation and inhibition techniques (including ability to give timely urgent verbal feedback).
- b. Manipulate another person's body in transfers, gait, positioning, exercise, and mobilization techniques. Manipulate evaluation and treatment equipment safely and accurately apply to patients. Manipulate bolsters, pillows, plinths, mats, gait assistive

5

devices, and other supports or chairs to aid in positioning, moving, or treating a patient effectively.

c. Competently perform and supervise cardiopulmonary resuscitation

3. Fine motor/hand skills:

- a. Legibly record thoughts for written assignments (including diagrams) and tests. Document evaluations, patient care notes, referrals, etc. in standard medical charts in hospital/clinical settings in a timely manner and consistent with the acceptable norms of clinical settings.
- b. Safely apply and adjust the dials or controls of therapeutic modalities.
- c. Safely and effectively position hands and apply mobilization and therapeutic techniques.

4. **Visual acuity** to:

- a. Read written and illustrated material in the English language, in the form of lecture handouts, textbooks, literature and patient's chart.
- b. Observe active demonstrations in the classroom.
- c. Visualize training videos, projected slides/overheads, X-ray pictures, and notes written on a blackboard/whiteboard.
- d. Receive visual information from patients, e.g., movement, posture, body mechanics, and gait necessary for comparison to normal standards for purposes of evaluation of movement dysfunctions.
- e. Receive visual information from treatment environment, e.g., dials on modalities and monitors, assistive devices, furniture, flooring, structures, etc.
- f. Receive visual clues as to the patient's tolerance of the intervention procedures. These may include facial grimaces, muscle twitching, withdrawal etc.

5. Auditory acuity to:

- a. Hear lectures and discussion in an academic and clinical setting.
- b. Distinguish between normal and abnormal breathing, lung and heart sounds using a stethoscope.

6. Communication:

- a. Effectively communicate information and safety concerns with other students, teachers, patients, peers, staff and personnel by asking questions, giving information, explaining conditions and procedures, or teaching home programs. These all need to be done in a timely manner and within the acceptable norms of academic and clinical settings.
- b. Receive and interpret written communication in both academic and clinical settings in a timely manner.
- c. Receive and send verbal communication in life threatening situations in a timely manner within the acceptable norms of clinical settings.
- d. Physiotherapy education presents exceptional challenges in the volume and breadth of required reading and the necessity to impart information to others. Students must be able to communicate quickly, effectively and efficiently in oral and written English with all members of the health care team.

7. Self care:

Maintain general good health and self care in order not to jeopardize the health and safety of self and individuals with whom one interacts in the academic and clinical settings.

AFFECTIVE LEARNING SKILLS: The student must be able to:

- 1. Demonstrate respect to all people, including students, teachers, patients and medical personnel, without showing bias or preference on the grounds of age, race, gender, sexual preference, disease, mental status, lifestyle, opinions or personal values.
- 2. Demonstrate appropriate affective behaviors and mental attitudes in order not to jeopardize the emotional, physical, mental, and behavioral safety of patients and other individuals with whom one interacts in the academic and clinical settings and to be in compliance with the ethical standards of the profession.
- 3. Acknowledge and respect individual values and opinions in order to foster harmonious working relationships with colleagues, peers, and patients.

PROFESSIONAL DRESS CODE STANDARDS:

It is important to portray a professional image. A clinician with inappropriate dress, grooming or conduct can damage the patient's confidence in the quality of their care, sometimes even resulting in a delay in the restoration of health.

Haircuts, hairstyling, and personal grooming need to be neat, conservative and inconspicuous. Grooming and style should be practical and allow one's duties to be performed without embarrassment or inconvenience

DRESS:

Modest casual wear is appropriate on campus and in class.

Clinical /Lab Dress: Aprons for all clinical assignments, any class that is held in a clinical facility and in any class where patients are present.

FRAMEWORK OF THE CURRICULUM

COURSE DURATION: Four years and Six months of Internship.

I B.P.Th.

- a. Deals with the basic foundation in medical as well as physiotherapy subjects. The foundation of human body structure & function & energy utilization is achieved by studying the subjects Human Anatomy, Physiology, and Biochemistry.
- b. Students knowledge of Physics i.e. Mechanics, Electricity, Water, Sound & Light is recalled to apply it on human body in understanding movements and the various physiotherapeutic modalities under the subject of Fundamentals of Electrotherapy & Fundamentals of Kinesiology & Kinesiotherapy.

II B.P.Th.

- a. Deals with understanding of altered physiology by studying pathology & Microbiology.
- b. The students get oriented to various Pharmacotherapeutic agents used along with their effects by studying Pharmacology.
- c. The students will study about normal and altered human mind & behavior by studying Psychology & Psychiatry. They will also learn skills required for effective communication with the patients and care givers.
- d. Students will acquire the knowledge of Biomechanics as applicable to human body in the context of Kinetics & kinematics of Joints, Movements & Daily activities under subject of Kinesiology and shall acquire knowledge and learn various physiotherapeutic skills on models in subject of Kinesiotherapy.
- e. In the subject of Electrotherapeutics, students will acquire knowledge and learn application & uses of various electrotherapeutic modalities on models.

III B.P.Th.

- a. Students acquire knowledge of all the clinical subjects like Orthopaedics, General Surgery, Medicine, Neurology, Paediatrics, Dermatology & Gynecology & Obstetrics, Community Medicine and Sociology.
- b. Students will acquire knowledge about the principles of International Classification of Functioning (I.C.F.) and its applicability in context to movement dysfunctions.
- c. Students will learn the physiotherapeutic evaluation skills including electrodiagnosis on patients to arrive at a Functional/ Physical Diagnosis in Neuromuscular, Cardiovascular & Respiratory dysfunction. They will also acquire knowledge of various specialized manual therapy and neurodevelopmental techniques and practice these skills on models under the subject of functional diagnosis and physiotherapeutic skills.

IV B.P.Th.

- a. Students will revise, recall and integrate the knowledge of previous years to evaluate, functionally diagnose, plan and execute short and long term management of various musculoskeletal, neurological & cardiovascular- respiratory dysfunctions in hospital and community settings.
- b. Students also acquire knowledge pertaining to health promotion & disease prevention throughout lifespan in the community. They will also be able to analyse, prevent and treat problems associated with various industries in community physiotherapy.
- c. Students will also acquire knowledge about biomechanical principles & application of variety of aids & appliances used for ambulation, protection & prevention by studying Bioengineering.
- d. Professional Practice and ethics as a subject will be studied in continuum from first year, so students will acquire the knowledge of ethical code of professional practice, as well as its moral& legal aspects. The principles of Hospital Administration, Management & Marketing will be studied separately.
- e. Students will also acquire knowledge of Research Methodology and Biostatistics and apply the knowledge in project work in community physiotherapy.

INTERNSHIP

- a. A period of 6 months (26 weeks) of continuous clinical practice to enhance the clinical reasoning, judgment, programme planning, intervention, evaluation of intervention, follow up and referral skills of all the dysfunctions and impairments learnt throughout the curriculum of four years.
- b. Those candidates declared to have passed the final year examination in all subjects shall be eligible for internship.
- c. Internship shall be done in a teaching hospital recognized by the University. A degree certificate shall be awarded ONLY on successful completion of six months of internship.
- d. The Internship will be rotatory and shall cover clinical branches concerned with Physiotherapy such as Orthopaedics, Cardiovascular & Respiratory including ICU, Neurology & Neurosurgery Paediatrics, General Medicine, Surgery, Obstetrics and Gynecology both inpatient and outpatient services.
- e. Successful Completion: The student must maintain a logbook. On completion of each posting, the same will have to be certified by the faculty in charge of the posting for both attendance as well as work done. On completion of all the postings, the duly completed logbook will be submitted to the Principal/Head of program to be considered as having successfully completed the internship program.

PROFESSIONAL PRACTICE AND ETHICS

(COLLEGE EXAMINATION IN FINAL YEAR)

TOTAL -15 HRS

COURSE DESCRIPTION:

This subject will be taught in continuum from first year to final year. An exam will be conducted only in final year. Professional and ethical practice curriculum content addresses the Knowledge, Skills and Behaviors required of the physiotherapist in a range of practice relationships and roles. The course will discuss the role, responsibility, ethics administration issues and accountability of the physical therapists. The course will also cover the history and change in the profession, responsibilities of the professional to the profession, the public and to the health care team. This includes the application of professional and ethical reasoning decision-making strategies and professional communication.

OBJECTIVES:

At the end of the course, the student will be compliant in following domains:

Cognitive: The student will

- a) Be able to understand the moral values and meaning of ethics.
- b) Acquire bedside manners and communication skills in relation with patients, peers, seniors and other professionals.

Psychomotor: The student will be able to:

Develop psychomotor skills for physiotherapist-patient relationship.

SYLLABUS

Sr. No.	Topics	Didactic Hrs	Visits/ Supervision Hours	Total Hrs
1.	Introduction to the history of Physiotherapy	02		
2.	Orientation to the curriculum, clinical areas and geographical location	03

HUMAN ANATOMY

(Didactic -150hrs + Practical / Laboratory -60hrs) **TOTAL -210 HRS**

COURSE DESCRIPTION:

The focus of this course is an in-depth study and analysis of the regional and systemic organization of the body. Emphasis is placed upon structure and function of human movement. A comprehensive study of human anatomy with emphasis on the nervous, musculoskeletal and circulatory systems is incorporated. Introduction to general anatomy lays the foundation of the course. Dissection and identification of structures in the cadaver supplemented with the study of charts, models, prosected material and radiographs are utilized to identify anatomical landmarks and configurations of the:

- Upper limb and thoracic region
- ► Lower limb, abdomen and pelvis
- ➤ Head and Neck
- Nervous system

Sr. No.	Regions	Didactic Hours	Practical Hours	Total Hours
1	GENERAL ANATOMY AND HISTOLOGY	17	03	20
2	MUSCULOSKELETAL SYSTEM	57	33	90
3	NEURO ANATOMY	32	12	44
4	SYSTEMIC ANATOMY	09	03	12
5	CARDIO VASCULAR & RESPIRATORY ANATOMY	13	05	18
6	ABDOMEN	04	02	06
7	SENSORY ORGANS	04	02	06
8	ENDOCRINE & EXOCRINE SYSTEM	04	-	04
9	RADIOLOGY	10	-	10
	TOTAL	150	60	210

OBJECTIVES:

1] MUSCULOSKELETAL ANATOMY

- i. The student should be able to identify & describe Anatomical aspects of muscles, bones, joints, their attachments & to understand and analyze movements.
- ii. Application of knowledge of anatomy on the living (living anatomy).
- iii. To understand the Anatomical basis of various clinical conditions.

2] NEURO ANATOMY

- i. To identify & describe various parts of nervous system.
- ii. To describe blood circulation of C.N.S. & spinal cord.
- iii. Be able to identify the Structures of various C.N.S Trans-sections.
- iv. To identify and describe the course of peripheral nerves.
- v. To understand anatomical basis of clinical conditions of nervous system.

3] CARDIOVASCULAR & RESPIRATORY ANATOMY

- i. To identify & describe various structures of the Cardio Vascular &Respiratory system and the course of blood vessels
- ii. Identify and describe various structures of Thoracic cage and mechanisms of Respiration
- iii. Be able to apply knowledge of Living anatomy with respect to Cardio Vascular &Respiratory system.
- iv. To understand anatomical basis of clinical conditions of cardiovascular &Respiratory system

4] To Obtain Knowledge of OTHER SYSTEMS & SENSORY ORGANS

SCHEME OF UNIVERSITY EXAMINATION

THEORY		Marks
* The question paper will give appropriate weightage to all the topics in the syllabus.		
Section A-MCQs	Q-1 -MCQs – based on MUST KNOW area [1 x 20]	20
Section B- S.A.Q.	Q-2 - Answer any FIVE out of SIX [5 x 3 = 15] This question should include: Digestive/ Uro-genital / Reproductive system / Special senses — Eye / Ear/ Skin / Circulatory system / General Anatomy/ General Histology Q-3- answer any THREE out of FOUR [3 x 5 = 15] Should be based on: Thorax / Soft parts Upper Limb / Soft part Lower Limb/ Soft parts Thorax / Spine / Neck.	30
Section C -L.A.Q.	Q-4] L.A.Q (should be based on Musculoskeletal anatomy) - 15 marks	30

Q-5] A -15 mar OR Q-5] B -15 mar (Should be based on Neuro-Anatomy -in cranial nerves with emphasis to III to XI LAQ should give break up of 15 marks e.g	rks cluding I nerves)
Total Marks	80

PRACTICAL		Marks
80 MARKS + I.A.	– 20 MARKS	100
	Based on:	
Spots	 i. Musculoskeletal (7x3) = 21 marks ii. Systemic (5x3) = 15 marks iii. Neuroanatomy (3x3) = 09 marks 	45
Radiology		05
Living anaton	ny	05
Viva	i. Hard parts ii. Soft parts	20
Journal Year work on practicals performed		05
	Total Marks	80

INTERNAL ASSESSMENT:

- 1. Two exams Terminal and prelims of 80 marks each (Theory & Practical) TOTAL 160 marks
- 2. I.A. to be calculated out of 20 marks (Theory & Practical)
- 3. Internal assessment as per University pattern.

HUMAN PHYSIOLOGY

(Theory -150 hrs, Practical / Laboratory -50 hrs) TOTAL 200 hrs

COURSE DESCRIPTION:

The course is designed to study the function of the human body at the molecular, cellular, tissue and systems levels. The major underlying themes are; the mechanisms for promoting homeostasis, cellular processes of the metabolism, membrane function and cellular signaling; the mechanisms that match supply of nutrients to tissue demands at different activity levels; the mechanisms that match the rate of excretion of waste products to their rate of production; the mechanisms that defend the body against injury and promote healing.

These topics address the consideration of nervous and endocrine regulation of the cardiovascular, hematopoietic, pulmonary, renal, gastro-intestinal and musculoskeletal systems including the control of cellular metabolism. The course stresses on the integrative nature of physiological responses in normal function and disease.

This course will serve as a pre-requisite/foundation for the further courses i.e. Exercise physiology or Pathology

Sr. No.	Topics	Didactic hrs	Practical hrs	Total hrs
1.	GENERAL PHYSIOLOGY	25	42	172
2.	NERVOUS SYSTEM	35		
3.	EXCRETORY SYSTEM	06		
4.	TEMPERATURE	02		
	REGULATION			
5.	ENDOCRINE SYSTEM	06		
6.	REPRODUCTIVE SYSTEM	08		
7.	SPECIAL SENSES	05		
8.	RESPIRATORY SYSTEM	20		
9.	CARDIOVASCULAR	20		
	SYSTEM			
10.	GASTRO INTESTINAL	03		
	SYSTEM			
11.	EXERCISE PHYSIOLOGY	015	08	023
12.	PHYSIOLOGY OF AGEING	005	-	005
	Total	150	50	200

OBJECTIVES:

At the end of the course, the candidate will:

- 1. Acquire the knowledge of the relative contribution of each organ system in maintenance of the Milieu Interior (Homeostasis)
- 2. Be able to describe physiological functions of various systems, with special reference to Musculo-skeletal, Neuro-motor, Cardio-respiratory, Endocrine, Uro-genital function, & alterations in function with aging
- 3. Analyze physiological response & adaptation to environmental stresses-with special emphasis on physical activity, altitude, temperature

4. Acquire the skill of basic clinical examination, with special emphasis to Peripheral & Central Nervous system, Cardiovascular & Respiratory system, & Exercise tolerance / Ergography

SYLLABUS

Sr. No.	Topics	Didactic Hrs
1	GENERAL PHYSIOLOGY	25
	a. Cell:	4
	. G	
	i. Structure of cell membrane	
	ii. Transport across cell membrane	
	iii. Homeostasis	
	b. Blood:	7
	i. Rh- ABO system & mismatch-transfusion	
	ii. WBC	
	iii. Plasma protein	
	iv. Platelets	
	v. Hemoglobin	
	vi. Normal values of blood (composition & function)	
	vii. Bleeding time & clotting time	
	c. Nerve:	6
	i. Structure, classification & Properties	
	ii. R.M.P& action potential	
	iii. Propagation of nerve impulse	
	iv. Nerve injuries –degeneration, regeneration and reaction of degeneration	
	d. Muscle:	8
	i. Structure- properties- classification- smooth, skeletal, cardiac, excitation/ contraction coupling	
	ii. Factors affecting development of muscle tension, fatigue, load.	
	iii. Neuro-muscular transmission; applied physiology:	
	Myasthenia gravis, Eaton Lambert Syndrome.	

Sr. No.	Topics	Didactic Hours
2	NERVOUS SYSTEM:	35
	 a. Introduction of nervous system, classification – C.N.S., P.N.S. & A.N.S. b. Synapse-structure, properties, & transmission; c. Reflexes-classification & properties; d. Receptor physiology: classification, properties. e. Physiology of Touch, Pain, Temperature & Proprioception; f. Sensory and motor tracts: effect of transaction (complete and incomplete) at various levels g. Physiology of Muscle Tone (muscle spindle); Stretch reflex h. Connection & function of Basal ganglia, Thalamus, Hypothalamus, Sensory and Motor cortex, Cerebellum, Limbic system, Vestibular Apparatus i. Autonomic nervous system: Structure and functions of the sympathetic and the parasympathetic nervous system. j. Learning, memory & conditioned reflex k. Physiology of Voluntary movement 	
3	EXCRETORY SYSTEM:	6
	 a. Kidneys-structure & function; b. Urine formation;(to exclude concentration and dilution) c. Juxtaglomerular apparatus d. Fluid and electrolyte balance – Na, K, H₂O e. Neural control of Micturation f. Applied physiology: Types of bladder 	
4	TEMPERATURE REGULATION	2
5	ENDOCRINE SYSTEM:	6
	 a. Secretion- regulation & function of Pituitary-Thyroid-Adrenal-Parathyroid-Pancreas b. Applied physiology (abnormalities) of the above mentioned glands 	
6	REPRODUCTIVE SYSTEM:	8
	 a. Physiology of ovary and testis b. Physiology of menstrual cycle and spermatogenesis c. Functions of progesterone, estrogen and testosterone d. Puberty & menopause e. Physiological changes during pregnancy 	

Sr. No.	Topics	Didactic Hours
7	SPECIAL SENSES:	5
	 a. Structure and function of the eye b. Applied physiology: errors of refraction, accommodation, reflexes – dark and light adaptation, photosensitivity. c. Structure and function of the ear d. Applied physiology- types of deafness 	
8	RESPIRATORY SYSTEM:	20
	 a. Introduction, structure and function of the RS b. Mechanics of respiration; c. Pulmonary Volumes & capacities; d. Anatomical & Physiological Dead space- ventilation/perfusion ratio, alveolar ventilation e. Transport of respiratory gases f. Nervous & Chemical control of respiration g. Pulmonary function tests-Direct & indirect method of measurement h. Physiological changes with altitude & acclimatization 	
9	CARDIOVASCULAR SYSTEM:	20
	 a. Structure & properties of cardiac muscle b. Cardiac impulse- initiation and conduction c. Cardiac cycle d. Heart rate regulation e. Blood pressure- definition-regulation- Cardiac output-regulation & function affecting; Peripheral resistance, venous return f. Regional circulation-coronary-muscular, cerebral g. Normal ECG. 	
10	GASTRO INTESTINAL SYSTEM:	3
	a. Absorption and digestion in brief b. Liver function	

Sr. No.	Topics	Didactic Hours		
11	EXERCISE PHYSIOLOGY	15		
	a. Basal Metabolic Rate and Respiratory Quotient			
	b. Energy metabolism			
	c. Fatigue			
	d. Oxygen debt			
	e. Acute cardio vascular changes during exercise, difference between mild, moderate and severe exercise, concept of endurance			
	f. Acute respiratory changes during exercise			
	g. Concept of training/conditioning, effects of chronic exercise/effect of training on the cardiovascular & respiratory system			
	h. Body temperature regulation during exercise			
	i. Hormonal and metabolic effects during exercise			
	j. Effects of exercise on muscle strength,power,endurance			
	k. Physical fitness and its components			
12	PHYSIOLOGY OF AGEING (With respect to all systems)	05		

PRACTICALS

Sr. No.	Topics	Practical Hours		
1.	Haematology – (demonstration only)	6hrs		
2.	GRAPHS:	5hrs		
	a. Skeletal muscle and its properties			
	b. Cardiac muscle-properties-effect of Ach & Adrenaline			
3.	Blood pressure- effects of change in posture & exercise	4hrs		
4.	Examination of pulse	2hrs		
5.	Spirometry	4hrs		
	a. Lung volumes and capacities			
	b. Timed vital capacity			
6.	Perimetry	1hr		
7.	Physical fitness:	8hrs		
	a. Breath holding			
	b. Mercury column test;			
	c. Cardiac efficiency test- Harvard step test- Master			
	step test			
8.	Clinical examination:	20hrs		
	History taking and general examination /Respiratory			
	system / cardio vascular system / Higher functions			
	/Cranial nerves /Reflexes / Motor & Sensory system			
	TOTAL 50 hrs			

RECOMMENDED TEXT BOOKS

- 1. Text book on Medical Physiology Guyton
- 2. Textbook of Physiology A K Jain (for MBBS students)

RECOMMENDED REFERENCE BOOKS

- 1. Review of Medical Physiology Ganong
- 2. Samson & Wright's Applied Physiology
- 3. Textbook of Medical Physiology Bern and Levy

SCHEME OF UNIVERSITY EXAMINATION

THEORY	20 MARKS	Marks
80 MARKS + I.A. – 20 MARKS * The question paper will give appropriate weightage to all the topics in the syllabus.		
Section A-MCQs	Q-1 -MCQs – based on MUST KNOW area [1 x 20]	20
Section B- S.A.Q.	Q-2 - Answer any FIVE out of SIX [5 x 3 = 15] Based on: Blood/G.I. tract / Electrolyte balance / Endocrine / Uro-genital System / General physiology /Special Senses (Eye/Ear/Skin) Q-3- Answer any THREE out of FOUR [3 x 5 = 15] Based on: Cardio-vascular system / Respiratory system / Exercise Physiology/ Nerve	30
Section C -L.A.Q.	Q-4] L.A.Q (Compulsory from Musculoskeletal) -15 marks Q-5] A - 15 marks OR Q-5] B -15 marks Based on: C.N.S./ Spinal Cord/ Electro-Neuro-Physiology /C.V.S. /R.S. LAQ should give break up of 15 marks – e.g. [3 +5+7]	30
	Total Marks	80

PRACTICAL		Marks
80 MARKS + I.A.	– 20 MARKS	100
Spots	Based on: Topic 1,2,3,6,7,8,9,11&12 (10 X 2 Marks)	20
Viva	Based on theory	20
Demonstration	On Clinical Physiology C.V.S. 10 Marks R.S. 10 Marks C.N.S. Cranial Nerves and Special Senses 15 Marks	35
Journal	Year work on practicals performed	05
	Total Marks	80

INTERNAL ASSESSMENT:

- 1. Two exams Terminal and prelims of 80 marks each (Theory & Practical)
 TOTAL 160 marks
- 2. I.A. to be calculated out of 20 marks (Theory & Practical)
- 3. Internal assessment as per University pattern.

BIOCHEMISTRY

(Didactic 46hrs+Demonstrations 4hrs) TOTAL 50 HRS

COURSE DESCRIPTION:

This course provides the knowledge and skills in fundamental organic chemistry and introductory biochemistry that are essential for further studies It covers basic biochemical, cellular, biological and microbiological processes, basic chemical reactions in the prokaryotic and eukaryotic cells, the structure of biological molecules, introduction to the nutrients i.e. carbohydrates, fats, enzymes, nucleic acids and amino acids.

Sr. No.	Topics	Didactic	Demonstrations	Total
		Hours	Hours	Hours
1	CARBOHYDRATES	9		9
2	PROTEINS	6		6
3	ENZYMES	4		4
4	VITAMINS	4		4
5	MINERALS	5		5
6	HORMONES	1		1
7	NUTRITION	3		3
8	CLINICAL BIOCHEMISTRY	6	4	10
9	LIPID	4		4
10	MUSCLE CONTRACTION	4		4
	TOTAL	46	4	50

OBJECTIVES:

The student would know:

- 1. Various biomolecules which are present in the body and functions
- 2. The formation and fate of these biomolecules
- 3. Their normal levels in body fluids required for functioning and their abnormal levels to understand the disease process.

SYLLABUS

Sr. No.	Topics	Didactic Hours	Demonstrations Hours	Total Hours
1	CARBOHYDRATES	9		9
	a. Chemistry, Definition, Classification with examples, Functions			
	b. Digestion and Absorption, Glycogenesis, Gluconeogenesis, Glycogenolysis and HMP pathway, Glycolysis, Electron transport chain for ATP synthesis, TCA cycle. Hormonal regulation of blood			
	c. Glucose, Glycogen storage disorders, Diabetes mellitus, Glycosuria, changes in Carbohydrate, Protein & Lipid metabolism.			
	d. All the metabolisms should be taught based on the following points such as starting and ending products, tissues of occurrence and the conditions when the pathway is activated, deactivated and significance of the pathway.			
2	PROTEINS	6		6
	a. Definition, Importance, Functional Classification, Digestion & Absorption, decarboxylation, deamination, transamination, transmethylation, Urea cycle, clinical significance of serum urea, function of glycine, Phenylalanine, trytophan, methionine tyrosine.			
	b. There should be an emphasis on understanding the structure of protein, the essential and non-essential amino acids.			
3	ENZYMES	4		4
	Definition, Modern Classification, Factors affecting enzymes Action, diagnostic & therapeutics uses & enzymes, Isoenzymes, Competitive & Non competitive inhibition.			
4	VITAMINS	4		4
	Definition, Classification, Fat & water soluble vitamins, functions, Deficiency manifestations sources & RDA			
Sr. No.	Topics	Didactic	Demonstrations	Total

		Hours	Hours	Hours
5	MINERALS	5		5
	Ca, P, Fe, I, Zinc, Selenium, Fluorine,			
	Magnesium include Na and K. Function			
	sources, Deficiency manifestations			
6	HORMONES	1		1
	Definition with mechanism of action,			
	classification.			
7	NUTRITION	3		3
	Composition of food, balanced diet,			
	Kwashiorkor, Marasmus, Nitrogen			
	balance, major Dietary constituent & their			
	importance. Include energy requirements,			
	factors affecting B.M.R., S.D.A. (Specific			
	Dynamic Action) and R.Q. (Respiratory			
	Quotient)			
8	CLINICAL BIOCHEMISTRY	6	4	10
	a. Liver Function Test, Renal Function Test,			
	Lipid profile in serum			
	b. Starvation metabolism, Hemoglobin			
	chemistry and metabolism			
	c. Demonstrations:			
	Demonstration of estimation of various			
	biomolecules and their interpretation			
	Interpret reports of various conditions			
	(including Diabetic profile, Cardiac profile,			
	Uric acid and Gout)			
9	LIPID	4		4
	Definition, classification with examples	-		
	biomedical importance, Phospholipids &			
	lipoproteins functions. Digestion &			
	absorption of lipid, β oxidation of fatty acid			
	with Energetics, Ketone bodies and their			
	metabolism, Prostaglandins and essential			
	fatty acids, Cholesterol, importance of			
	cholesterol, obesity			
10	MUSCLE CONTRACTION	4		4
	Mechanism & Biochemical events			-
	Connective Tissue- Biochemistry of			
	connective tissue Collagen-Glyco-protein			
	proteoglycans			
	TOTAL	46	4	50

RECOMMENDED TEXT BOOKS

- 1. Biochemistry Dr. Satyanarayan
- 2. Text book of Biochemistry for Medical students Dr. Vasudevan / Shri Kumar
- 3. Biochemistry Dr. Pankaja Naik

RECOMMENDED REFERENCE BOOK

1. Review of Biochemistry (24th edition) - Harpar

SCHEME OF UNIVERSITY EXAMINATION

THEORY ONLY	Marks	
40 marks + I.A 1		
There shall be no I * The question pap- topics in the syllable	50	
Section -A-Q-1 MCQs – based on MUST KNOW area [1x10]		10
Section-B-	SAQ-to answer any FIVE out of SIX [5x3]	15
Q-2 & Q-3	SAQ – to answer any THREE out of FOUR [3x5]	15
	40	

INTERNAL ASSESEMENT

- 1. Two exams Terminal and prelims of 40 marks each TOTAL 80 marks
- 2. I.A. to be calculated out of 10 marks (Theory only)
- 3. Internal assessment as per University pattern.

FUNDAMENTALS OF KINESIOLOGY & KINESIOTHERAPY

(Didactic – 100 Hrs & Practical / Laboratory – 150 Hrs) **TOTAL 250 HRS**

COURSE DESCRIPTION:

This course covers the definition of various terms used in mechanics, biomechanics kinesiology as well as its importance in physical therapy. It applies the mechanical principles to simple equipments of therapeutic gymnasium and familiarizes the candidate to its use. It covers the types of human motions as well as planes and relative axes of motion. It also explains the inter-relationship among kinematic variables and utilizes this knowledge to describe and analyze motion. It covers the classification of the joints and muscles along their distinguishing characteristics and skill of measurement of its ranges in various planes and axes. This course additionally covers therapeutic principles and skills of application of massage, yoga, aerobic exercise and use of suspension therapy. It also enhances the skill of evaluation of vital parameters & sensory system.

Sr. No.	Topics	Didactic Hours	Practical/ Laboratory	Total Hours
		Hours	Hours	Hours
1	MECHANICS & BASIC	25		25
	BIOMECHANICS			
2	BIO-PHYSICS RELATED TO	20	25	45
	KINESIOTHERAPY			
3	CLASSIFICATION OF MOVEMENTS	10	15	25
4	BASIC EVALUATION	15	35	50
5	MASSAGE	05	20	25
6	RELAXATION	05	10	15
7	AEROBIC EXERCISE	05	05	10
8	YOGA	15	40	55
	TOTAL	100	150	250

OBJECTIVE:

Cognitive:

At the end of the course, the candidate will be able to:

- a) Define the various terms used in relation to Mechanics, Biomechanics & Kinesiology
- b) Recall the basic principles of Biophysics related to mechanics of movement / motion & understand the application of these principles to the simple equipment designs along with their efficacy in Therapeutic Gymnasium & various starting positions used in therapeutics.

Psychomotor:

At the end of the course, the candidate will be able to:

- a) Describe & also acquire the skills of use of various tools of the Therapeutic Gymnasium
- b) Demonstrate the movements in terms of various anatomical planes and axes.
- c) Demonstrate various starting & derived positions used in therapeutics.
- d) Describe physiological principles & acquire the skills of application of therapeutic massage
- e) Acquire the skills of assessment of basic evaluation like sensations, reflexes &vital parameters
- f) Acquire the skill of objective assessment of Range of Motion of the joints by Goniometry
- g) Describe physiological basis and principle of relaxation and acquire the skills of relaxation methods
- h) Describe physiological responses and principles of aerobic exercises for general fitness & demonstrate fitness skills on self & group.
- Describe physiological principles and acquire the skill of performing Pranayama & Yogasanas

SYLLABUS

Sr. No.	Торіс	Didactic Hours	Practical/ Laboratory Hours	Total Hours
	MECHANICS & BASIC BIOMECHANICS	25		25
1.	a. Mechanics & Application to human bodyi. Definition and terminologies: Mechanics	20		20
	(Statics & Dynamics), Biomechanics, Kinetics, Kinematics (Osteokinematics, Arthrokinematics, Open Chain & Closed Chain kinematics)			
	 ii. Axes / planes, iii. Laws of inertia & motion, iv. Gravity, C.O.G., L.O.G. and B.O.S. v. Equilibrium – Types and affecting factors vi. Mechanics of Forces Work, Energy, Power, Friction, Momentum, Parallelogram of Forces vii. Torque viii. Pendulum ix. Mechanical and Anatomical pulleys x. Levers 			
	xi. Fluid mechanics related to Hydrotherapy (physics, statics & dynamics)			

Sr. No.	Торіс	Didactic Hours	Practical/ Laboratory Hours	Total Hours
	b. Muscle Mechanics	5		5
	 i. Types of Muscles- Anatomical & Physiological ii. Types of muscle work / Contraction iii.Muscle Action: Roles as Agonist, Antagonist, Fixators, Synergist iv. Active & Passive insufficiency v. Range of muscle work ,Angle of pull – with importance to efficiency of muscle work and stability of joint 			
2	BIO-PHYSICS RELATED TO KINESIOTHERAPY	20	25	45
	a. Starting Positions & Derived Positions i. Application of stability ii. BOS, Gravity and muscle work in relation to various positions	10	5	15
	 b. Therapeutic Gymnasium i. Use of accessories such as Pulleys Springs, Shoulder wheel, Walking aids, ii. Finger ladder, Therapeutic balls, Weights, Resistance bands, tubes, & wands iii. Applied mechanics of all above accessories 	5	5	10
	 c. Suspension Therapy i. Principles ii. Suspension Apparatus iii. Types of Suspension iv. Effects and uses v. Techniques for individual joints 	5	15	20
3	CLASSIFICATION OF MOVEMENTS	10	15	25
	 a. Definition and classification b. Principles of movements c. Effects, uses and Techniques (active: assisted, free, assisted- resisted, resisted & passive) 			

Sr. No.	Торіс	Didactic Hours	Practical/ Laboratory Hours	Total Hours
4	BASIC EVALUATION	15	35	50
	a. Assessment of Vital Parameters	5	5	10
	i. Temperatureii. Blood Pressureiii. Heart Rate/ Pulse rateiv. Respiratory Rate			
	v. Chest expansion b. Assessment of Sensations and Reflex testing	5	5	10
	c. Goniometry	5	25	30
	 i. Definition and Types of Goniometers ii. Principles iii. Techniques for individual joints with biomechanical principles iv. Uses 			
5	MASSAGE	05	20	25
	 a. Definition b. Classification c. Principles d. Effects & uses e. Indications and contra indications f. Techniques- Upper limb, Lower Limb, Neck, Back, Abdomen, Face & Scalp 			
6	RELAXATION	05	10	15
	 a. Principles, b. Techniques along with their effects & uses i. General - Jacobson's, Shavasana & Reciprocal (Laura Mitchell) ii. Local - Heat, Massage, Gentle/Rhythmic passive movements 			
7	AEROBIC CONDITIONING AND BASIC PRINCIPLES OF GENERAL FITNESS (as applied to self and group)	5	5	10
	 a. Physiology of aerobic and anaerobic exercise. b. Components of fitness (definition of terms only) c. Warm up d. Cool down exercises e. Group & Recreational activities 			

Sr. No.	Topic	Didactic Hours	Practical/ Laboratory Hours	Total Hours
8	YOGA	15	40	55
	a. Definition			
	b. Principles of Yoga			
	c. Yogasana- Technique, Benefits, Contraindications			
	& cautions for each Asanas:			
	i. Asanas in supine			
	a) Pawanamuktasana			
	b) Ardha Halasana			
	c) Halasana			
	d) Setubandhasana			
	e) Naukasana			
	f) Matsyasana			
	g) Shavasana			
	h) Sarvangasana			
	ii. Asanas in prone			
	a) Bhujangasana			
	b) Ardha-Shalabhasana			
	c) Dhanurasana			
	d) Makarasana			
	iii. Asanas in sitting			
	a) Padmasana, Siddhasana, Sukhasana			
	b) Yogamudrasana			
	c) Virasana			
	d) Vajrasana			
	e) Gomukhasana			
	f) Pashchimottanasana			
	iv. Asanas in standing			
	a) Padhastasana, Padangusthasana, Uttanasana			
	b) Utkatasana			
	c) Tadasana			
	d) Trikonasana			
	v. Pranayama			
	a) Anulom-vilom			
	b) Kapalbhati			

PRACTICAL: Practical demonstrations of:

Sr. No.	Topics
1	Various starting and derived positions
2	The techniques of active, passive, assisted and resisted movements
3	The techniques of various accessories and equipments used in therapeutic gymnasium its biomechanical principles and uses.
4	The techniques of use of suspension method for assisted and resisted movements
5	Relaxation procedures
6	Massage techniques
7	Yogasanas and Pranayama
8	Aerobic exercise for self and others
9	Assessment of vital parameters in different body position (supine, sitting and standing) and of sensory system and reflexes.
10	Measurement of joint R.O.M. through goniometry, method of fixation and measurement.

RECOMMENDED TEXT BOOKS

- 1. Principles of Exercise Therapy Dena Gardiner
- 2. Massage, Manipulation & Traction Sydney Litch
- 3. Therapeutic Exercise Sydney Litch
- 4. Massage M. Hollis
- 5. Practical Exercisetherapy- Margaret Hollis
- 6. Hydrotherapy Kisner, Hollis
- 7. Measurement of Joint Motion Cynthia Norkins.
- 8. Biomechanics Cynthia Norkins
- 9. Clinical Kinesiology-Brunnstrom
- 10. Yogic Exercises-Physiologic and Psychic processes-- S. Datta Ray

FUNDAMENTALS OF ELECTROTHERAPY

Didactic 95 hrs+ Practical 105hrs [TOTAL-200HRS]

COURSE DESCRIPTION:

This course will cover the basic principles of Physics that are applicable in medical equipments used in Physiotherapy. It will also help to understand the fundamentals of currents, sound waves, Heat & its effects, electromedical radiations and their effects as well as their application in physical therapy. It covers the skill of application of superficial thermal agents and Cryotherapy.

Sr.	Topic	Didactic	Practical/	Total
No.		Hours	Lab Hours	hours
1	MEDICAL ELECTRONICS AND	55	15	70
	ELECTRICITY:			
	a) Fundamentals of Low frequency currents	32	09	41
	b) Fundamentals of High frequency currents	13	06	19
	c) Electro Magnetic Spectrum	5	-	5
	d) Cellular Bio-physics	3	-	3
	e) Environmental currents	2	-	2
2	ELECTRICAL MODALITIES	25	40	065
3	SUPERFICIAL THERMAL AGENTS	15	50	065
	TOTAL	95	105	200

OBJECTIVES:

Cognitive:

At the end of the course, the candidate will be able to:

- a) Recall the physics principles & Laws of Electricity, Electro magnetic spectrum, & ultra sound
- b) Describe effects of environmental & man made electromagnetic field at the cellular level & risk factors on prolonged exposure.
- c) Describe the Main electrical supply, Electric shock, precautions
- d) Enumerate Types & Production of various Therapeutic electrical currents & describe the panel diagrams of the machines

Psychomotor:

At the end of the course the candidate will be able to –

- a) Test the working of the various electrotherapeutic-equipments
- b) Describe in brief, certain common electrical components such as transistors, valves, capacitors, transformers etc & the simple instruments used to test / calibrate these components [such as potentiometer, oscilloscope , multimeter] of the circuit ; & will be able to identify such components.
- c) Describe & identify various types of electrodes used in therapeutics, describe electrical skin resistance & significance of various media used to reduce skin resistance.

d) Acquire knowledge of various superficial thermal agents such as Paraffin wax bath, Cryotherapy, Hydrocollator packs, Home remedies, their physiological & therapeutic effects, Merits / demerits & acquire the skill of application.

PRACTICAL

Practical demonstrations of:

Sr. No.	Торіс
1.	Various ELECTRICAL COMPONENTS like Diodes & Triodes, Rheostat,
	Capacitor, Potentiometer, Switches, Plugs and Pulse generator
2	The technique of testing of mains supply
3	The techniques of testing the following ALONG WITH PANEL DIAGRAM:
	i. Low Frequency currents- Diagnostic Muscle stimulator, Transcutaneous
	Nerve Stimulation
	ii. Medium Frequency currents-I.F.T.
	iii. High Frequency currents- Short Wave Diathermy, Ultrasound
	iv. I.R. (no panel diagram)
	v. U.V.R. (no panel diagram)
4	The skill of application of THERMAL AGENTS (on models):
	i. Hot packs
	ii. P.W.B.
	iii. Whirlpool
	iv. Contrast bath
	v. Cryotherapy

RECOMMENDED TEXT BOOKS

- 1. Clayton 1s Electro therapy 3rd & 10th edition
- 2. Electro therapy explained Low & Reed
- 3. Electro Therapy Kahn
- 4. Electrotherapy Evidence Based Practice-Sheila Kitchen 11th edition

RECOMMENDED REFERENCE BOOK

1. Clinical Electrotherapy -- Nelson & Currier

SCHEME OF UNIVERSITY EXAMINATION

THEORY			Marks	
	80 MARKS + I.A. – 20 MARKS * The question paper will give appropriate weightage to all the topics in the syllabus.			
Section A -M.C.Qs.	Q-1 MCQs – based on MUST KNOW area	[1 x 20]	20	
Section B- S.A.Q.	Q-2 - Answer any FIVE out of SIX Q-3- Answer any THREE out of FOUR	[5 x 3 =15] [3 x 5 =15]	30	
Section C -L.A.Q.	 Q-4] L.A.Q * Based on superficial Thermal agents Q-5] (Based on Production /Panel Diagram frequency current) OR Q-5] (Based on Production / Panel Diagram Medium frequency current) LAQ should give break up of 15 marks – e. 	-15 marks of low/ -15 marks	30	
	Total Marks		80

PROFESSIONAL PRACTICE AND ETHICS

(COLLEGE EXAMINATION IN FINAL YEAR)

Total -15 HRS

COURSE DESCRIPTION:

This subject would be taught in continuum from first year to final year. An exam in theory would be conducted only in final year. Professional and ethical practice curriculum content addresses the Knowledge, Skills and Behaviors required of the physiotherapist in a range of practice relationships and roles. The course will discuss the role, responsibility, ethics administration issues and accountability of the physical therapists. The course will also cover the history and change in the profession, responsibilities of the professional to the profession, the public and to the health care team. This includes the application of professional and ethical reasoning and decision-making strategies, professional communication.

OBJECTIVES:

At the end of the course the candidate will be compliant in following domains: Cognitive:

- a) Be able to understand the moral values and meaning of ethics
- b) Will acquire bedside manners and communication skills in relation with patients, peers, seniors and other professionals.

Psychomotor:

- a) Be able to develop psychomotor skills for physiotherapist-patient relationship.
- b) Skill to evaluate and make decision for plan of management based on sociocultutural values and referral practice.

Affective:

- a) Be able to develop behavioral skills and humanitarian approach while communicating with patients, relatives, society at large and co-professionals.
- b) Be able to develop bed side behavior, respect & maintain patients' confidentiality.

PATHOLOGY

[DIDACTIC -50 HRS]

COURSE DESCRIPTION:

Students will develop an understanding of pathology underlying clinical disease states involving the major organ systems and epidemiological issues. Students will learn to recognize pathology signs and symptoms considered red flags for serious disease. Students will use problem-solving skills and information about pathology to decide when referrals to another health care provider or alternative interventions are indicated. Students will develop the ability to disseminate pertinent information and findings, and ascertain the appropriate steps to follow.

The course more deals with structural impairments as an important part in ICF Classification.

	TOTAL	

OBJECTIVES:

At the end of the course, the candidate:

Cognitive:

- a) Will have sound knowledge of concepts of cell injury & changes produced by different tissues, organs and capacity of the body in healing process.
- b) Acquire the knowledge of general concepts of neoplasia with reference to the Etiology, gross & microscopic features, & diagnosis, in different tissues, & organs of the body.
- c) Acquire knowledge of common immunological disorders & their resultant effects on the human body.

Psychomotor:

- a) Recall the Etiology–pathogenesis, the pathological effects & the clinico–pathological correlation of common infections & non-infectious diseases.
- b) Understand in brief, about the common Haematological disorders & investigations necessary to diagnose them.
- c) Correlate normal & altered morphology of different organ systems in different diseases needed for understanding disease process & their clinical significance

Sr. No.	Topics	Didactic Hours
1	GENERAL PATHOLOGY	4
	 a. Cell injury-Causes, Mechanism & Toxic injuries with special reference to Physical including ionizing radiation, Chemical & Biological b. Reversible injury (degeneration)- typesmorphology-cloudy swelling, hyaline, fatty changes c. Intra-cellular Accumulation- Mucin, Protein d. Irreversible cell injury-types of necrosis- Apoptosis -Calcification- Dystrophic & Metastasis e. Extra-cellular accumulation-Amylidosis 	
Sr. No.	Topics	Didactic Hours
2	INFLAMMATION & REPAIR	6

		1
	 a. Acute inflammation – features, causes, vascular & cellular events b. Morphologic variations-Ulcers c. Inflammatory cells & Mediators d. Chronic inflammation: Causes, Types, Nonspecific & Granulomatous – with examples e. Wound healing by primary & secondary union, factors promoting & delaying healing process f. Healing at various sites- bone, nerve & muscle g. Regeneration & Repair 	
3	IMMUNO -PATHOLOGY	4
	 a. Immune system: organization-cells- antibodies-regulation of immune responses b. Hyper-sensitivity (types and examples including graft rejection) c. Secondary Immuno-deficiency including H.I.V. d. Basic concepts of autoimmune disease (emphasis on S.L.E. & R.A.) 	
4	CIRCULATORY DISTURBANCES	4
	 a. Oedema - pathogenesis - types - transudates / exudates b. Chronic venous congestion- lung, liver c. Thrombosis - formation - fate - effects d. Embolism - types- clinical effects e. Infarction - types - common sites f. Gangrene - types - etiopathogenesis g. Shock - Pathogenesis, types 	
5	PATHOLOGIC CHANGES IN VITAMIN DEFICIENCIES	1
Sr. No.	Topics	Didactic Hours
6	GROWTH DISTURBANCES	4
	a. Atrophy, Hypertrophy, Hypoplasia, Metaplasia,	

_		I
	Agenesis, Dysplasia b. Neoplasia classification, Histogenesis, Biologic behaviors, difference between Benign & Malignant tumour c. Malignant neoplasms- grades-stages-local & distal spread d. Carcinogenesis: Physical, Chemical, Occupational, Heredity, Viral, Nutritional e. Precancerous lesions & Carcinoma in situ f. Tumour & host interactions—local and systemic effects-metastatic (special reference to bones and C.N.S.)	
7	MEDICAL GENETICS (in brief): a. Classifications with examples of Genetic disorders	1
8	SPECIFIC PATHOLOGY	10
	 a. C.V.S. i. Atherosclerosis - Ischemic Heart Diseases – Myocardial Infarction– Pathogenesis /Pathology ii. Hypertension iii. C.C.F. iv. Rheumatic Heart Diseases 	
	v. Peripheral Vascular Diseases b. Respiratory i. C.O.P.D. ii. Pneumonia (lobar, bronchial, viral), Lung Abscess iii. T. B.: Primary, Secondary – morphologic types iv. Pleuritis & its complications v. Lung collapse – Atelectasis vi. Occupational Lung diseases	
	(with special emphasis on Silicosis, Asbestosis, Anthracosis) vii. A.R.D.S. Topics	Didactic hrs
Sr. No.		
	 c. Neuropathology: i. Reaction of nervous tissue to injury, infection & ischemia ii. Meningitis: Pyogenic, T.B.M., Viral iii. Cerebro-Vascular Diseases – Atherosclerosis – 	
	Thrombosis, Embolism, Aneurysm, Hypoxia,	

	Infarction & Hemorrhage, Hydrocephalous, Increased Intracranial Pressure iv. Leprosy	
	v. Parkinsonism	_
9	MUSCULAR DISORDERS a. Classification of Muscular disorders with emphasis on Muscular Dystrophies	3
10	NEURO-MUSCULAR JUNCTION	1
	a. Myasthenia gravis	
	b. Myasthenic syndrome	
11	BONE & JOINTS	5
	 a. Osteomyelitis – Rickets – Osteomalacia – Osteoporosis b. Arthritis- degenerative (Osteoarthritis, Calcaneal spur, Periarthritis, Spondylosis) - inflammatory (R.A., Ankylosing Spondylitis, Gout) c. Miscellaneous-P.I.D., Haemarthosis d. Infective-T.B. 	
12	G.I. SYSTEM	1
	a. Gastric / Duodenal ulcer, Enteric fever, T.B., Enteritis, Gastritis (related to consumption of NSAID)	
13	ENDOCRINE	2
	a. Hypo and Hyperthyroidismb. Diabetes	
14	HEPATIC DISEASES	1
	a. Cirrhosis – emphasis to systemic effects of portal hypertension	
Sr. No.	Topics	Didactic Hours
15	CLINICAL PATHOLOGY	3
	 a. Anemia – (deficiency) – T.C./D.C./ Eosinophilia Anaemia b. Muscle / Skin / Nerve biopsy c. Microscopic appearance of muscle necrosis – fatty infiltration

- 2. General Pathology Bhende

SCHEME OF UNIVERSITY EXAMINATION

- ALONG WITH MICROBIOLOGY SUBJECT

MICROBIOLOGY

(Didactic-31hrs + Demonstration -4hrs) **TOTAL 35 HRS**

COURSE DESCRIPTION:

Students will develop an understanding of pathology underlying clinical disease states and involving the major organ systems and epidemiological issues. Epidemiological issues will be presented and discussed. Students will learn to recognize pathology signs and symptoms considered red flags for serious disease. Students will use problem-solving skills and information about pathology to decide when referral to another health care provider or alternative intervention is indicated. Students will develop the ability to disseminate pertinent information and findings, and ascertain the appropriate steps to follow.

- 3. Internal assessment as per University pattern

PHARMACOLOGY

[DIDACTIC - 50 hrs]

COURSE DESCRIPTION:

This course covers the basic knowledge of Pharmacology including administration, physiologic response and adverse effects of drugs under normal and pathologic conditions. Topics focus on the influence of drugs in rehabilitation patient/client management. Drugs used in iontophoresis and phonoporesis will be discussed in detail.

Sr. No.	Topics	Didactic
		Hours
1	GENERAL PHARMACOLOGY	04
2	DRUGS ACTING ON C.N.S	11

11	DERMATOLOGICAL DRUGS	01
	TOTAL	50

OBJECTIVES:

At the end of the course, the candidate will be able to:

Cognitive:

- a. Describe Pharmacological effects of commonly used drugs by patients referred for Physiotherapy; list their adverse reactions, precautions, contraindications, formulation & route of administration.
- b. Identify whether the pharmacological effect of the drug interferes with the Therapeutic response of Physiotherapy & vice versa
- c. Indicate the use of analgesics & anti-inflammatory agents with movement disorders with consideration of cost, efficiency, & safety for individual needs.

Psychomotor:

Get the awareness of other essential & commonly used drugs by patients- The bases for their use & common as well as serious adverse reactions.

PSYCHIATRY (INCLUDING PSYCHOLOGY)

[Didactic 30hrs + Clinical 20hrs]- TOTAL 50HRS

COURSE DESCRIPTION:

The course design increases awareness of psychosocial issues faced by individuals. Their significance at various points on the continuum of health and disability should be emphasised. The course discusses personal and professional attitudes and values as they relate to developing therapeutic relationships. It emphasizes on communication skills for effective interaction with patients, health-care professionals and others. It expects students to identify common psychiatric conditions.

Sr. No.	Topics	Didactic Hours	Clinical Hours	Total Hours
1	PSYCHOLOGY	10		10
2	PSYCHIATRY	20	20	40
	TOTAL	30	20	50

OBJECTIVES:

At the end of the course, the candidate will be able to:

Cognitive:

- a. Define the term Psychology & its importance in the Health delivery system, & will gain knowledge of Psychological maturation during human development & growth & alterations during aging process.
- b. Understand the importance of psychological status of the person in health & disease; environmental & emotional influence on the mind & personality.
- c. Have the knowledge and skills required for good interpersonal communication.

Psychomotor:

- a. Enumerate various Psychiatric disorders with special emphasis to movement / Pain & ADLs $\,$
- b. Acquire the knowledge in brief, about the pathological & etiological factors, signs / symptoms & management of various Psychiatric conditions.
- c. Understand the patient more empathetically.

Sr. No.	Topics	Didactic Hours
1.	PSYCHOLOGY	
	 a. Psychology: Definition, understanding, Nature & its fields and subfields 	1
	b. Developmental psychology (childhood, adolescence, adulthood and old age) and its theories in brief	2
	c. Learning: Theories of learning, Role of learning in human life	2
	d. Memory – types – Forgetting causes	2
	e. Attention & perception Nature of attention [in brief] Nature of perception, Principles of grouping]	1
	f. Motivation and theories: conflict and frustration – Types of Common Defence mechanisms, Stress - common reactions to frustrations	2
2.	PSYCHIATRY	20
	a. Psychiatric History & Mental Status Examination	1
	b. Classification of Mental disorders	1
	c. Schizophrenia & its types	1
	d. Other psychotic disorders (Psychotic disorder, Delusional disorder, Schizo-affective disorders, Post partum psychosis	1
	e. Mood disorder	2
	f. Organic brain disorders (delirium, dementia, Amnestic syndromes, Organic personality disorder,)	2
	g. Anxiety disorders: Phobia, Obsessive Compulsive Disorder, Post Traumatic Disorders and Conversion disorder	2

- 2. Internal Assessment to be calculated out of 10 marks (Theory only)
- 3. Internal assessment as per University pattern.

KINESIOLOGY

DIDACTIC-80 HRS

COURSE DESCRIPTION:

This course is based on anatomical, physiological & related kinesiological principles for normal human movement. Students have the opportunity to develop and acquire understanding of kinesiological responses for the efficacy in various kinesiotherapeutic applications.

Sr.	Topics	Didactic
No		Hours
1.	INTRODUCTION TO BIOMECHANICS	20
2.	REGIONAL KINESIOLOGY	40
3.	KINETICS AND KINEMATICS OF GAIT & ADLs	20

Objective – At the end of the course, the candidate will be able to –

- 1. Understand the principles of Biomechanics.
- 2. Acquire the knowledge of kinetics and kinematics of Spine, Extremities, Temporo-Mandibular joint, Thoracic cage
- 3. Acquire the knowledge of Musculo skeletal movements during normal Gait and Activities of Daily Living

KINESIOTHERAPY

Didactic-80 Hrs + Practical/ Laboratory-160 HRS [TOTAL - 240 HRS]

COURSE DESCRIPTION:

This course is based on anatomical and physiological & related kinesiological principles for normal human movement and for the efficacy in the assessment methods for mobility, muscle strength. Students have the opportunity to develop and acquire understanding of physiological responses to various types of training and develop skills of exercise programs (on models). Exercise components of muscle strength, flexibility, balance, breathing and gait are examined. Evidence of appropriate, safe and effective exercise design and proper exercise biomechanics and prescription parameters are addressed with all interventions.

Sr.	TOPICS	Didactic	Practical/ Lab	Total
No.		Hours	Hours	Hours

	AND BALANCE			
4.	FUNCTIONAL REEDUCATION	05	05	10
5.	NEUROMUSCULAR CO-ORDINATION	05	05	10
6.	GAIT &WALKING AIDS	10	15	25
7.	BRONCHIAL HYGIENE	12	15	27
	TOTAL	80	160	240

OBJECTIVES:

At the end of the course, the candidate will be able to

Cognitive:

Describe the Biophysical properties of connective tissue, & effect of mechanical loading, & factors which influence the muscle strength, & mobility of articular & periarticular soft tissues.

Psychomotor:

- 1. Apply the biomechanical principles for the efficacy in the assessment methods for mobility, muscle strength
- 2. Acquire the skill of subjective and objective assessment of individual & group muscle strength
- 3. Acquire the skills of subjective and objective methods of muscle strengthening
- 4. Describe the physiological effects, therapeutic uses, merits / demerits of various exercise modes including Hydrotherapy
- 5. Demonstrate various therapeutic exercises on self;& acquire the skill of application on models with Home Programs
- 6. Analyze normal Human Posture [static & dynamic].
- 7. Acquire the skill of functional re-education techniques on models
- 8. Acquire the skill of Balance and Coordination Exercises
- 9. Acquire the skill of using various walking aids for Gait Training
- 10. Acquire the skill of demonstrating breathing exercises and retraining on self and others
- 11. Acquire the skill of demonstrating Postural Drainage on models

- 3. Internal assessment as per University pattern.

ELECTROTHERAPY

Didactic –100 hrs+ Practical / Laboratory –200 hrs [**TOTAL - 300 HRS**]

COURSE DESCRIPTION:

This course tends to explore fundamental skills in application of electrotherapeutic modalities and knowledge of indications, contraindications and physiological principles needed for appropriate patient care. It includes topics such as Electrical stimulation, T.E.N.S., Iontophoresis, Ultrasound / Phonophoresis, Diathermy and Electro diagnostic testing etc.

Sr.	Topic	Didactic	Practical	Total
No.				
1	PAIN	003	-	003
2	LOW FREQUENCY CURRENTS	037	085	122

7	ACTINOTHERAPY	015	025	040
8	ELECTROTHERAPY: WOUNDCARE	010	015	025
	TOTAL	100	200	300

OBJECTIVES:

At the end of the course, the candidate will be able to:

Cognitive:

- 1. Acquire the knowledge about the physiology of pain, Pain pathways & Methods of pain modulation, selection of appropriate modality for Pain modulations.
- 2. Describe the Physiological effects, Therapeutic uses, indication & contraindications of various Low/ Medium & High Frequency modes / Actinotherapy
- 3. Describe the Physiological Effects & therapeutic uses of various therapeutic ions & topical pharmaco -therapeutic agents to be used for the application of iontophoresis & sono/phonophoresis

Psychomotor:

- Acquire the skills of application of the Electro therapy modes on models, for the purpose of Assessment & Treatment.
- 2. Acquire an ability to select the appropriate mode as per the tissue specific & area specific application.

PROFESSIONAL PRACTICE AND ETHICS

(COLLEGE EXAMINATION IN FINAL YEAR)

TOTAL -15 HRS

COURSE DESCRIPTION:

This subject would be taught in continuum from first year to final year. An exam in theory would be conducted only in final year. Professional and ethical practice curriculum content addresses the Knowledge, Skills and Behaviors required of the physiotherapist in a range of practice relationships and roles. The course will discuss the role, responsibility, ethics administration issues and accountability of the physical therapists. The course will also cover the history and change in the profession, responsibilities of the professional to the profession, the public and to the health care team. This includes the application of professional and ethical reasoning and decision-making strategies, professional communication.

OBJECTIVES:

At the end of the course the student will be compliant in following domains:

Cognitive:

- a) Be able to understand the moral values and meaning of ethics.
- b) Will acquire bedside manners and communication skills in relation with patients, peers, seniors and other professionals.

Psychomotor:

- a) Be able to develop psychomotor skills for physiotherapist-patient relationship.
- b) Skill to evaluate and make decision for plan of management based on sociocultutural values and referral practice.

Affective:

- a) Be able to develop behavioral skills and humanitarian approach while communicating with patients, relatives, society at large and co-professionals
- b) Be able to develop bed side behavior, respect & maintain patients' confidentiality

SURGERY-I

(General Surgery, Cardiovascular & Thoracic Surgery & Plastic/ Reconstructive Surgery)

(Didactic-35hrs + Clinical -20 hrs) **TOTAL =55HRS**

COURSE DESCRIPTION:

This course intends to familiarize students with principles of General surgery including various specialties like cardiovascular, thoracic, neurology and plastic surgery. It also familiarizes the students with terminology and abbreviations for efficient and effective chart reviewing and documentation. It explores various conditions needing attention, focusing on epidemiology, pathology, as well as primary and secondary clinical characteristics and their surgical and medical management. The purpose of this course is to make physiotherapy students aware of various surgical conditions general surgery and specialty surgeries so these can be physically managed effectively both pre as well as postoperatively.

	SURGERY			
3.	PLASTIC SURGERY /	5	5	10
	RECONSTRUCTIVE SURGERY			
	TOTAL	35	20	55

OBJECTIVES:

At the end of the course, the candidate will be able to:

- 1. Describe the effects of surgical trauma & Anaesthesia in general
- 2. Clinically evaluate & describe the surgical management in brief of
 - a) General Surgery
 - b) Neuro Surgery
 - c) Cardiovascular and Thoracic Surgery
 - d) ENT & Ophthalmic Surgery
 - e) Plastic & Reconstructive Surgery
- 3. Describe pre-operative evaluation, surgical indications in various surgical approaches, management and post operative care in above mentioned areas with possible complications.
- 4. Be able to read & interpret findings of the relevant investigations

Section B- S.A.Q.	Q-2 - Answer any FIVE out of SIX [5 x 3 = 15] * Based on topics – GENERAL SURGERY & PLASTIC SURGERY	15	
	Q-3 - Answer any FIVE out of SIX [5 x 3 = 15] * Based on topics – CARDIOVASCULAR & THORACIC SURGERY	15	
	Total Marks	40	

Clinical Case Presentation (COLLEGE EXAMINATION)	Marks
Conducted at the end of Preliminary examination - Based on Case presentation, Examination and Viva	20

INTERNAL ASSESSMENT:

- 1. One examination of Total 40 marks (Theory only)
- 2. Internal Assessment to be calculated out of 10 marks
- 3. Internal assessment as per University pattern.

SURGERY-II (ORTHOPAEDICS)

(Didactic-40hrs + Clinical -20hrs) **TOTAL =60 HRS**

COURSE DESCRIPTION:

This course intends to familiarize students with principles of orthopaedic surgery along with familiarization with terminology and abbreviations for efficient and effective chart reviewing and documentation. It also explores various orthopaedic conditions needing attention, focusing on epidemiology, pathology, as well as primary and secondary clinical characteristics and their surgical and medical management. The purpose of this course is to make physiotherapy students aware of various orthopaedic surgical conditions so these can be physically managed effectively both pre as well as postoperatively.

Sr.	Topics	Didactic	Clinical	Total
No.		Hours	Hours	Hours
1	FRACTURES	6	3	9
2	DISLOCATIONS & SUBLUXATIONS	4	2	6
3	SOFT TISSUE AND TRAUMATIC	4	2	6
	INJURIES

	DISORDERS			
7	GENERAL ORTHOPAEDIC	5	3	8
	DISORDERS			
8	TUMORS	2	2	4
	TOTAL	40	20	60

OBJECTIVES:

At the end of the course, the candidate will –

- a) Be able to discuss the, aetiology, Pathophysiology, clinical manifestations & conservative
 / surgical management of various traumatic & cold cases of the Musculoskeletal
 Conditions.
- b) Gain the skill of clinical examination; apply special tests & interpretation of the preoperative old cases & all the post-operative cases.
- c) Be able to read & interpret salient features of the X-ray of the Spine & Extremities and correlate the radiological findings with the clinical findings.
- d) Be able to interpret Pathological / Biochemical studies pertaining to Orthopaedic conditions.

Sr. No.	Topics	Didactic Hours	Clinical Hours	Total Hours

MEDICINE-I

(Cardiovascular Respiratory Medicine, General Medicine & Gerontology)

(Didactic-45 hrs + Clinical-10 hrs) **TOTAL-55 HRS**

COURSE DESCRIPTION:

This course intends to familiarize students with medical terminology & abbreviations for efficient & effective chart reviewing & documentation. It also explores selected systemic diseases, focusing on epidemiology, pathology, histology, etiology as well as primary & secondary clinical characteristics & their management. Discusses & integrates subsequent medical management of General, Rheumatology, Gerontology, Cardio-vascular & Respiratory systems, to formulate appropriate intervention, indications, precautions & contraindications.

	GERONTOLOGY			
	TOTAL	45	10	55

OBJECTIVES:

At the end of the course, the candidate will:

- 1. Be able to describe Etiology, Pathophysiology, Signs & Symptoms & Management of the various Endocrinal, Metabolic, Geriatric & Nutrition Deficiency conditions.
- 2. Be able to describe Etiology, Pathophysiology, Signs & Symptoms, Clinical Evaluation & Management of the various Rheumatologic Cardiovascular & Respiratory Conditions.
- 3. Acquire skill of history taking and clinical examination of Musculoskeletal, Respiratory, Cardio-vascular & Neurological System as a part of clinical teaching.
- 4. Be able to interpret auscultation findings with special emphasis to pulmonary system.
- 5. Study Chest X-ray, Blood gas analysis, P.F.T. findings & Haematological studies, for Cardiovascular, Respiratory, Neurological & Rheumatological conditions.
- 6. Be able to describe the principles of Management at the Intensive Care Unit.
- 7. Be able to acquire the skills of Basic Life Support.
- 8. Acquire knowledge of various drugs used for each medical condition to understand its effects and its use during therapy.

GYNAECOLOGY & OBSTETRICS

(COLLEGE EXAMINATION)

(Didactic - 20 hrs + Clinical – 10 hrs) **TOTAL 30 HRS**

COURSE DESCRIPTION:

This course intends to provide introduction to women's health which includes problems related to pregnancy, osteoporosis, and other disorders specific to women. Topics will focus on medical terminology, clinical examination, evaluation, comparing contemporary, traditional interventions and the impact of evolving technology in this area. It also emphasises on evaluation & medical treatment of pelvic floor dysfunctions.

Sr.	Topics	Didactic	Practical/Lab	Total
No.		Hours	Hours	Hours

	& post operative care			
4	POST NATAL PERIOD	2	5	7
	a. Puerperium & Lactation			
	b. Complications of repeated child bearing			
	with small gaps			
	c. Methods of contraception			
5	INFERTILITY	1		1
	a. Management with emphasis on			
	PCOS/PCOD			
6	URO-GENITAL DYSFUNCTION	3	1	4
	a. Uterine prolapse – Classification &			
	Management (Conservative / Surgical)			
	b. ii) Cystocoele, Rectocoele, Enterocoele,			
	Urethrocoele			
7	GYNAECOLOGICAL SURGERIES	2	2	4
	(Pre and post surgical management)			
8	PRE, PERI & POST MENOPAUSE	2	1	3
	a. Physiology			
	b. Complications &			
	c. Management			
9	PELVIC INFLAMMATORY DISEASES	1	1	2
	with special emphasis to backache due to			
	Gynaecological / Obstetrical conditions			

CLINICAL (10 hrs)

1. **Evaluation & presentation** of One case Each in:

- a) Uro-genital dysfunction
- b) Antenatal care
- c) Postnatal care
- d) Following normal labour
- e) Following Caesarean section
- f) Pelvic Inflammatory Diseases
- 2. **Observation** One Normal & One Caesarean delivery & One Hysterectomy / Repair of the Uro-genital Prolapse

RECOMMENDED TEXT BOOKS

- 1. Text book of Gynaecology Datta New Central Book Agency
- 2. Text book of Obstetrics -- Datta New Central Book Agency

SCHEME OF COLLEGE EXAMINATION (THEORY ONLY)

THEORY ONLY	Marks			
*Emphasis to be given conditions / age related	50			
Section -A-Q-1	MCQs – based on MUST KNOW area [20X1]	20		
Section-B-Q-2	SAQ-to answer any FIVE out of SIX [5x3]	15		
Section-C-Q-3	15			
	Total Marks			

Passing in the exam is Mandatory

Grades: A = 75% & above, A = 66 to 74.5%, B + = 55 to 65%, B = 50 to 54.5%, C = less than 50%.

DERMATOLOGY

(COLLEGE EXAMINATION)

TOTAL - 10 HRS

OBJECTIVES:

At the end of the course, the student will be able to describe the Pathophysiology, Signs & Symptoms, Clinical Features, Examination & Management of Common Skin Conditions like Leprosy, Psoriasis, Bacterial & Fungal Infections of the skin, connective tissue disorder, hand eczema, drug reaction, cutaneous manifestation of HIV, & Sexually Transmitted Diseases

SYLLABUS

Sr.	Topics	Didactic
No.		Hours
1	Introduction to Dermatology, basic skin lesions & History taking	1
2	 a. Skin infections (Part I) – Scabies / Pediculosis / Bacterial infections b. Skin infection (Part II) Viral / Fungal / Cutaneous T.B. 	2
3	Connective tissue disorder-Scleroderma, S.L.E., Dermatomyositis, Morphia	1
4	 a. Hand eczema, Psoriasis, Psoriatic arthritis, Reiter's Syndrome b. Cutaneous hyperplasia-Keloid, Hypertrophic scar, Corn, Callosity 	1
5	Leprosy & Deformity	2
6	a. Cutaneous Manifestation of HIV b. Hyperhydrosis	1
7	a. Drug reaction b. Urticaria Genodermatosis -Epidermolysis bullosa c. Sexually Transmitted skin lesions PUVA Treatment	2
	TOTAL	10

RECOMMENDED TEXT BOOK

1. Textbook of dermatology – Dr. Khopkar

SCHEME OF COLLEGE EXAMINATION (THEORY ONLY)

THEORY		Marks
_	be no LAQ in this paper] will give appropriate weightage to all the topics in	25
Section A- Q-1	MCQs – based on MUST KNOW area [10X1]	10

FUNCTIONAL DIAGNOSIS & PHYSIOTHERAPEUTIC SKILLS

(Didactic - 135 hrs + Clinical – 325 hrs) **TOTAL 460 HRS**

COURSE DESCRIPTION:

- 1. Functional Diagnosis & Physiotherapeutic Skills is a stepping stone to introduce students to actual concepts of PT assessment and later to the treatment concepts
- 2. Functional Diagnosis focuses on the assessment of all the body systems i.e. Musculoskeletal, Neurological and Cardiovascular-Respiratory in order to study the various impairments and their impact on activity and participation of the individual taking into consideration the contextual factors as well. It also emphasizes on the clinical reasoning of the underlying components of a universal evaluation tool (ICF) for a better understanding of the patient in a holistic manner. The student is also subjected to learn basics of manipulative, cardiovascular-respiratory and neuro-therapeutic skills on models so that he/she will be able to apply these principles eventually on patients.
- 3. The student will also gain a sound knowledge of electro-diagnosis, which is an integral part of Functional Diagnosis.

Sr. No.	Торіс	Didactic Hours	Practical / Laboratory Skills Hours	Total Hours
1.	SECTION-I INTERNATIONAL CLASSIFICATION OF FUNCTION, DISABILITY & HEALTH (ICF)	05	-	005
2.	SECTION-II MUSCULOSKELETAL EVALUATION & MANIPULATIVE SKILLS	40	140	180
3.	SECTION -III CARDIO VASCULAR RESPIRATORY EVALUATION & RELATED SKILLS	40	055	095
4.	SECTION – IV NEUROTHERAPEUTIC EVALUATION & ELECTRO DIAGNOSIS	50	130	180
	TOTAL	135	325	460

OBJECTIVES:

Cognitive:

At the end of the course, student will be able to:

- 1. Understand the use of ICF.
- 2. Acquire the knowledge of human growth and development from new life to birth and adulthood
- 3. Understand structure and function of nerve and muscle as a base for understanding the electro-diagnostic assessment.
- 4. Understand the use of appropriate tools or instruments of assessment in Musculoskeletal, Neurological and Cardio-vascular conditions.
- 5. Understand the theoretical basis and principles of manipulative skills, neurotherapeutic skills and skills of cardiopulmonary care and resuscitation
- 6. Document results of assessment to evaluate the patient from time to time.

Psychomotor:

Student will be able to:

- 1. Perform assessment of measures of body structures and functions related to tissue mechanics.
- 2. Perform assessment of measures of body structures and functions related to motor control affecting activity and participation, quality of life and independence.
- 3. Perform the skill of electro-diagnosis (SD Curve) and observe skills of EMG and NCV studies, to understand the documentation of finding of these studies.
- 4. Interpretation and analysis of assessment and findings.
- 5. Demonstrate skills of manual therapy musculoskeletal, neurotherapeutics and cardiovascular and respiratory skills on models (Laboratory work).

Affective:

Student will be able to:

- 1. Select appropriate assessment techniques to facilitate safety, sensitive practices in patient comfort and effectiveness.
- 2. Demonstrate safe, respectful and effective performance of physical therapy handling techniques taking into account patient's clinical condition, need for privacy, resources available and the environment.
- 3. Follow the principles of appropriate handling technique that is draping, hand placement, body part positioning, manual techniques, lifting and transfer techniques.
- 4. Communicate with patients and their families/caregivers regarding the need and uses of various assessment techniques.

PROFESSIONAL PRACTICE AND ETHICS

(COLLEGE EXAMINATION)

Total -60Hrs (I to IV year)

COURSE DESCRIPTION:

This subject will be taught in continuum from first year to final year. An examination will be conducted only in final year. Professional and ethical practice curriculum content addresses the Knowledge, Skills and Behaviors required by the physiotherapist in a range of practice relationships and roles. The course will discuss the role, responsibility, ethics administration issues and accountability of the physical therapists. The course will also cover the history and change in the profession, responsibilities of the professional to the profession, the public and to the health care team. This includes the application of professional and ethical reasoning and decision-making strategies and professional communication.

Sr.	Topics	I	II	III	IV	Total
No.		B.P.Th.	B.P.Th.	B.P.Th.	B.P.Th.	Hours
1	PROFESSIONAL ISSUES & ETHICS	15 hrs	15 hrs	15 hrs	15 hrs	60

OBJECTIVES:

At the end of the course, the student will be compliant in following domains:

Cognitive: The student will

- 1. Be able to understand the moral values and meaning of ethics
- 2. Be able to learn and apply ethical code of conduct in fields of clinical practice, learning, teaching, research and physiotherapist-patient relationship
- 3. Acquire bedside manners and communication skills in relation with patients, peers, seniors and other professionals
- 4. Will acquire the knowledge of the basics in Managerial & Management skills, & use of information technology in professional Practice

Psychomotor: The student will be able to:

- 1. Develop psychomotor skills for physiotherapist-patient relationship
- 2. Develop the skill to evaluate and make decisions for plan of management based on sociocultutural values and referral practice

Affective: The student will be able to:

- 1. Develop behavioral skills and humanitarian approach while communicating with patients, relatives, society and co-professionals
- 2. Develop bedside behavior, respect & maintain patients' confidentiality

- 1. Rules & Regulation of Indian Association of Physiotherapists
- 2. W.C.P.T. ethics (from their website)
- 3. Gazette of Maharashtra Council for Occupational therapists & Physiotherapists

SCHEME OF COLLEGE EXAMINATION

THEORY ONLY	Marks			
[There shall be no LAQ in this paper] * The question paper will give appropriate weightage to all the topics in the syllabus.				
Section A-Q-1	tion A-Q-1 MCQs – based on MUST KNOW area [20 X1]			
Section P. O. 2 & O.2	SAQ-to answer any FIVE out of SIX [5 x 3]	15		
Section-B-Q-2 & Q3 SAQ – to answer any THREE out of FOUR [3 x 5]				
Total Marks				

Passing in the examination is Mandatory

Grades: A + = 75% & above, A = 66 to 74.5%, B + = 55 to 65 %, B = 50 to 54.5%, C = less than 50%.

ADMINISTRATION, MANAGEMENT & MARKETING

(COLLEGE EXAMINATION)

Total – 20 HRS

COURSE DESCRIPTION:

This curriculum content addresses the Knowledge, Skills and Behaviors required of the physiotherapist in a range of practice relationships and roles. The course will discuss the role, responsibility, administration issues of the physiotherapists. The course will also cover responsibilities of the professional to the profession, the public and to the health care team. This includes the application of professional and ethical reasoning and decision-making strategies, professional communication, reflective practice strategies and personal management issues (stress, work-life balance). Factors that influence individual practice are addressed, including the availability and accessibility of local health care resources as well as the ethical, legal and regulatory requirements of practicing the physiotherapy profession in a given jurisdiction.

OBJECTIVES:

At the end of the course the student will be compliant in following domains:

Cognitive:

The student will:

- a. Learn the management basics in fields of clinical practice, teaching, research and physiotherapy practice in the community.
- b. Acquire communication skills in relation with patients, peers, seniors and other professionals & the community.
- c. Acquire the knowledge of the basics in Managerial & Management skills, & use of Information technology in professional Practice

Psychomotor:

The student will be able to:

- a. Develop psychomotor skills for physiotherapy practice.
- b. Develop skill to evaluate and make decision for plan of management based on sociocultutural values and referral practice.

Affective:

The student will be able to:

Develop behavioral skills and humanitarian approach while communicating with patients, relatives, society at large and co-professionals.

MUSCULOSKELETAL PHYSIOTHERAPY

(Didactic - 60 hours + Practical-140 hours)**TOTAL: 200 HOURS**

COURSE DESCRIPTION:

This course includes a study of applied anatomy and physiology of the musculo-skeletal system along with pathological changes and patho-mechanics of the system. It discusses relevant tests and measures for determining impairment and differentiating the diagnosis based on the specificity and sensitivity of the assessment instruments as related to patients with disorders of the musculo-skeletal system.

Musculo-skeletal Physiotherapy focuses on maximizing functional independence and well-being. The course uses a patient-centered model of care with multi-system assessment, evidence based interventions and a significant patient education component to promote a healthy, active lifestyle and community-based living.

The candidate will have a sound understanding of theory, scientific evidence and best practices in the areas of the Musculo-skeletal System including Movement Sciences, Psychosocial Sciences and Physiotherapy.

Sr. No.	Topics	Didactic Hours	Clinical Hours		
1.	Use of ICF model in physiotherapy management of health condition of musculoskeletal system	02	00		
2.	Outcome measures – and Evidence Based Practice	02	00		
3.	Biomechanical / Physiological basis of	04	05		
	physiotherapy intervention skills				
4.	Physiotherapy interventions with goal setting for dysfu	ınctions due to)		
	musculoskeletal health conditions secondary to conservative or surgical				
	management of:

	Inflammatory conditions Infectious Diseases of bones & joints Metabolic & Hormonal Disorders	04 02 02	05 05 05		
	Inflammatory conditions Infectious Diseases of bones & joints Metabolic & Hormonal Disorders Congenital & Acquired Deformities	04 02 02 06	05 05 05 10		
	Inflammatory conditions Infectious Diseases of bones & joints Metabolic & Hormonal Disorders Congenital & Acquired Deformities Peripheral Nerve Injuries & Plexus Injuries	04 02 02 06 03	05 05 05 10 05		

OBJECTIVES:

At the end of the course, student will be able to:

Cognitive:

- a) Identify, evaluate, analyze & discuss primary and secondary musculo-skeletal dysfunction, based on biomechanical, kinesiological & patho-physiological principles.
- b) Correlate the same with radiological, electrophysiological, biochemical/ haematological investigations as applicable & arrive at the appropriate Physiotherapy diagnosis with skillful evaluation of structure and function with clinical reasoning.
- c) Understand the pharmaco-therapeutics, its interaction with physiotherapeutic measures and modify physiotherapeutic intervention appropriately.
- d) Apply knowledge of psychosocial factors (personal and environmental factors in the context of disability associated with the musculo-skeletal system or multiple body systems) for behavioral and lifestyle modification and use appropriate training and coping strategies.

Psychomotor:

- a) Apply theoretical basis of physiological effects, indications, contraindications; and best available evidence on the effectiveness, efficacy and safe application guidelines for a full range of physiotherapeutic strategies and interventions, including appropriate modes of soft tissue & joint mobilization, electrotherapy, therapeutic exercise, and appropriate ergonomic advise that can be employed to manage problems of the individual's structures, functions, activities and participation, capacity and performance levels associated with the musculo-skeletal system, for relief of pain & prevention, restoration and rehabilitation measures for maximum possible functional independence at home, workplace and in community.
- b) Prescribe and train for appropriate orthoses, prostheses and walking aids based on musculoskeletal dysfunction.

Affective:

Acquire ethical skills by demonstrating safe, respectful and effective performance of physical handling techniques taking into account the patient's clinical condition, the need for privacy, the physiotherapist, the resources available and the environment.

SYLLABUS

Sr. No.	TOPICS	Didactic Hours	Practical Hours	Total Hours
1	Use of ICF model (Bio, Psycho and Social) to plan Short term and Long term goals in physiotherapy management of health condition of musculoskeletal system a. Identification of short term and long term goals based on i) Capacity and Performance related to activities and participation to enhance functioning ii) Personal and Environment factors -facilitators and barriers that affect disablement and functioning b. Documentation of disability and functioning	02	-	02
2	 c. Red flags- Recognizing signs and symptom a. Introduction to functional scales as outcome measures Generic and Disease specific. 	01	-	01
	b. Evidence base practice in musculoskeletal health conditions- levels of evidence, clinical application	01	-	01
3	Biomechanical / Physiological basis of following modes physiotherapy interventions implemented during all three stages of tissue healing - a. Electrotherapeutic modes for pain- acute and chronic pain syndromes, swelling, wound healing, reeducation	01	00	01
	b. Therapeutic exercise to alleviate pain, increase mobility, muscle performance (strength) endurance, motor control, muscle length, posture and gait training	02	00	02
	c. Taping techniques for pain relief, support and posture correction i. Principles ii. Indications / Contraindications iii. Types of tapes and terminologies used iv. Techniques	01	05	06
4	The following topics are applicable to all conditions related to musculo-skeletal dysfunction throughout lifespan in acute care setting, hospital, chronic conditions at home and in community on the basis of:			
Sr. No.	TOPICS			Total Hours

- 1. Evaluation, interpretation of investigations and appropriate clinical reasoning for Functional diagnosis (ICF).
- 2. Evidence-based analysis of tools and techniques, (including Quality of Life questionnaires), and planning, prescription & implementation of short term & long term goals of Physiotherapy with appropriate documentation of the same.
- 3. Application of appropriate electro therapeutic modes for relief of acute & chronic pain, swelling and for wound healing, muscle / movement re-education etc with clinical reasoning.
- 4. Application of appropriate exercise therapeutic modes for improving joint mobility, muscle strength & endurance and motor control.
- 5. Application of advanced therapeutic modes of manual mobilization techniques (non-thrust techniques to be applied on extremities only), Friction Massage, Myofascial Release, Muscle Energy Techniques and Neuro Dynamic Techniques on patients.
- 6. Application of appropriate therapeutic exercise using therapeutic gymnasium tools as and when indicated, for relief of pain, enhancing structural stability, strength & endurance, and functional maintenance &/ or restoration including posture correction and gait training including preventive measures.
- 7. Prescription of appropriate orthotic & prosthetic devices.
- 8. Various taping techniques for support & pain relief; principles, indications, contraindications, types of tapes used & relevant terminology.
- 9. Appropriate Home Program & Ergonomic advise for preventive measures & functional efficiency at home, work place and during recreation. Advice to Parents & Care Givers.

Physiotherapy interventions with goal setting for dysfunctions due to impairments of Pain, Mobility, Muscle performance(Strength), Endurance, Motor Control, Muscle length, Posture and Movement Balance and Gait for common health conditions secondary to conservative or surgical management of the following regions, with appropriate consideration of red flags:

Topics	Didactic Hours	Clinical/ Pract Hrs	Total hours
1. Manifestations of trauma and their complications:	16	40	56
a. Bones – fractures & fracture-dislocations of extremities & spine and their complications & management	08	20	
b. Soft tissues injuries of extremities & spine and their complications & Management, contused lacerated wounds (CLWs) Burns complications and management, Crush injuries and its conservative and post surgical management.	08	20	
2. Degenerative Arthritis a. Osteoarthritis of knee b. Peri-arthritis of shoulder c. Spinal degenerative conditions like Sponylosis, Spondylysis, Spondylolisthesis, and Spinal Canal Stenosis	07	45	52
 3. Inflammatory conditions a. Rheumatoid, Gouty, Septic arthritis b. Spondylo-arthropathies e.g. Ankylosing Spondylitis. c. Cellulites and its complications. d. Post incisional inflammation and infection. e. Myositis ossificans and traumatica. f. Avascular necrosis 	04	05	09
 4. Infectious Diseases of bones & joints of extremities & spine a. Tuberculosis b. Osteomyelitis 	02	05	07
5. Metabolic & Hormonal Disorders a. Osteoporosis b. Osteomalacia	02	05	07
6. Congenital & Acquired Deformities of extremities & spine a. CTEV b. DDH b. Kyphosis c. Genu valgus / varus g. Coxa vara / valga etc. h. Deformities of the foot	06	10	16
7. Peripheral Nerve Injuries & Plexus Injuries- complications & management	03	05	08
8. Soft tissue injuries during sports and as a result of Over-use: conservative and operative management	04	05	09
9. Musculo-skeletal complications in Cerebral Palsy & Poliomyelitis and reconstructive surgeries.	02	05	07
Topics	Didactic	Clinical/	Total

	Hours	Pract Hrs	hours
10. Tumours of bone tissue.	01		01
11. Vascular disorders affecting musculoskeletal system- V.I.C., C.R.P.S., Compartment syndrome	01	02	03
 12. Traumatic Amputation a. Types b. Complications and management inclusive of prosthetic prescription & training 	04	08	12

CLINICAL:

SUPERVISED CLINICAL PRACTICE:

During this supervised clinical practice, student should be able to successfully execute the competencies in assessment, Functional diagnosis on ICF basis, plan of care and therapeutic interventions relating to musculo-skeletal dysfunctions. Student should become familiar with performance of these skills in all settings (inpatient and outpatient) as well as on all types of conditions (surgical, non-surgical, paediatric and geriatric). Student should learn to perform these skills objectively under the supervision of trained physical therapists. Student is required to keep a performance record of all listed competencies during the clinical practice and successfully perform on real patients during the final evaluation of the course.

CLINICAL COMPETENCIES:

A.COMPETENCY IN ASSESMENT AND CLINICAL REASONING:

Student should be able to apply the ICF framework in selecting measurement tools to ensure a holistic approach to evaluation of body structure and function, activities, participation; and select and administer assessment/evaluation tools and techniques suitable for the patient's problems and condition(s) based on the best available evidence and interpret the information obtained demonstrating evidence-based decision-making and safe handling technique such as:

- 1. Risk factor screening (Red flags & Yellow flags).
- 2. Assessment of Musculo-skeletal dysfunction.
- 3. Interpretation of Radiological, Electrophysiological, Haematological and Biochemical investigations.
- 4. Aerobic fitness and Functional performance testing as appropriate
- 5. Identification and quantification of environmental and home barriers and facilitators
- 6. Identification and analysis of body mechanics during self-care, home management, work, community, tasks, or leisure activities.
- 7. Identification and analysis of ergonomic performance during work

(job/school/play):

- 8. Assessment of Quality of Life through use of appropriate questionnaire and generic or disease-specific scales (nice to know)
- 9. Identification and prioritization of impairments in body functions and structures, and activity limitations and participation restrictions to determine specific body function and structure, and activities and participation towards which the intervention will be directed
- 10. State the evidence (patient/client history, lab diagnostics, tests and measures and scientific literature) to support a clinical decision.
- 11. Determine the predicted level of optimal functioning and the time required to achieve that level.
- 12. Recognize barriers that may impact the achievement of optimal functioning within a predicted time frame and ways to overcome them when possible

B. COMPETENCY IN DEVELOPING PLAN OF CARE:

Student should be able to:

- 1. Identify patient goals and expectations.
- 2. Design a Plan of Care with measurable functional goals (short-term and long-term) that are prioritized and time bound.
- 3. Consult patient and/or caregivers to develop a mutual agreement regarding the plan of care.
- 4. Identify indications/ additional needs for consultation with other professionals & appropriate referrals.
- 5. Select the interventions that are safe, realistic and meet the specified functional goals and outcomes in the plan of care: (a) identify precautions and contraindications, (b) provide evidence for patient-centered interventions that are identified and selected, (c) define the specificity of the intervention (time, intensity, duration, and frequency).
- 6. Measure and monitor patient response to intervention and modify elements of the plan of care and goals in response to changing patient/client status, as needed.
- 7. Establish criteria for discharge based on patient goals and current functioning and disability.

C. **COMPETENCY IN PHYSIOTHERAPEUTIC INTERVENTION:** Important influences on Musculo-skeletal physiotherapy management choices may include but not limited to:

- 1. Diverse settings of care including critical, acute, long term, rehabilitation, and community care;
- 2. Lifespan issues ranging from the neonatal stage to those associated with aging;

- 3. Life style modification for diseases and for prevention
- 4. Skill of application of physical and electrical agents for relief of acute & chronic pain and swelling.
- 5. Facilitation, re-education and training of muscle strength, endurance & motor control, posture and gait through skillful use of various therapeutic exercise techniques with appropriate therapeutic gymnasium equipment.
- 6. Skill of application of therapeutic modes of improving joint mobility and soft tissue flexibility like joint mobilization techniques and soft tissue techniques like Muscle Energy Techniques, Myofascial Release, Friction Massage, Neuro Dynamic Techniques etc.
- 7. Functional training in self care, home, work (job, school and play), community and leisure activities

DOCUMENTATION

Presentation & Documentation of 8 Cases (4 traumas, 4 cold) for patient management using ICF model as following:

(Assessment, Evaluation, Diagnosis, Prognosis, Intervention, Outcome)

- 1. Soft tissue lesion
- 2. Fractures of upper Limb (Including Hand Injury),
- 3. Fractures of lower limb,
- 4. Fractures of spine with/without Neurological condition
- 5. Degenerative/Inflammatory arthritis of peripheral skeletal joint
- 6. Degenerative /inflammatory arthritis of Spine
- 7. Musculoskeletal condition of Hand & Foot
- 8. Amputation

RECOMMENDED TEXT BOOKS

- 1. Therapeutic Exercise O'Sullivan
- 2. Orthopaedic Physical Therapy Donatelli
- 3. Cash's Textbook of Orthopedics & Rheumatology for Physiotherapists
- 4. Tidy's Physical Therapy
- 5. Manual Mobilization of Extremity Joints Kaltenborn
- 6. Therapeutic Exercise: Foundations and Techniques Kolby & Carolyn Kisner
- 7. Physical Rehabilitation Susan O'sullivan

RECOMMENDED REFERENCE BOOKS

- 1. Manual Therapy: Nags, Snags, MWMs, etc 6th Edition Brian R Mulligan
- 2. Maitland's Peripheral Manipulation Elly Hengeveld
- 3. Neural tissue mobilization Butler
- 4. Brukner & Khan's Clinical Sports Medicine Peter Brukner, Karim Khan (Mcgraw Medical)
- 5. Therapeutic Exercise: Moving Toward Function Carrie M. Hall, Lori Thein Brody
- 6. Manual Mobilization of Extremity Joints -Kaltenborn
- 7. Neural Tissue Mobilization Butler
- 8. Taping Techniques –Rose Mac Donald
- 9. Clinical Orthopaedic rehabilitation-Broadsman

SCHEME OF UNIVERSITY EXAMINATION

THEORY		Marks
80 MARKS + I.A. – 20 MARKS * The question paper will give appropriate weightage to all the topics in the syllabus.		
Section A -M.C.Qs.	Q-1 -MCQs – based on MUST KNOW area [20 x 1=20]	20
Section B- S.A.Q.	Q-2 - Answer any FIVE out of SIX $[5 \times 3 = 15]$	
Section B- S.A.Q.	Q-3- Answer any THREE out of FOUR $[3 \times 5 = 15]$	30
Section C -L.A.Q.	* Based on topics- structured question based on ICF model with emphasis to goal setting and treatment intervention Q-4] L.A.Q15 marks Q-5] -15 marks OR Q-5] -15 marks LAQ should give break up of 15 marks – e.g. [3 +5+7]	30
	Total Marks	80

PRACTICAL		Marks
80 MARKS + I.A. –	20 MARKS	100
LONG CASE	 a. Subjective and Physical Examination -10 marks b. Evaluation and Physical therapy diagnosis (ICF) – 10 marks c. Plan of care - Goal setting – 10 marks d. Demonstration of any one important test and treatment intervention on patient –15 marks [Student will be evaluated in cognitive, psychomotor and affective domains.] 	45
SHORT CASE	One Short case on: Demonstrations of two physiotherapy intervention skills for effective patient management 2 x 10 marks	20
SPOTS	5 spots - (5 x2 Marks= 10 Marks) 3 minutes for each spot X- ray of extremities and spine, Orthoses, Prostheses, Metal Implant	10
JOURNAL	Documentations- Assessment, Evaluation, Diagnosis, Prognosis, Intervention of Case along with ICF	5
	Total Marks	80

INTERNAL ASSESSMENT:

- 1. Two examinations Terminal and preliminary examination (Theory & Practical) of 80 marks each TOTAL 160 marks
- 2. Internal Assessment to be calculated out of 20 marks.
- 3. In Practicals of Terminal & Preliminary examinations, Spots will be of 15 marks instead of 10 marks (3 marks X 5), No marks will be allotted for the journal in Terminal & Preliminary examinations
- 4. Internal assessment (Theory) as per University pattern.

NEUROPHYSIOTHERAPY

(Didactic 60 hrs + Clinical 140 hrs) TOTAL 200 HRS

COURSE DESCRIPTION:

This course includes a study of applied anatomy and physiology of the neuromuscular system along with the pathological changes and patho-mechanics of the system. It discusses relevant tests and measures for determining impairment and differentiating the diagnosis based on the specificity and sensitivity of the assessment instruments as related to patients with disorders of the neuromuscular system.

Neurophysiotherapy curriculum emphasizes the selection and use of measurement tools and management techniques based on the best available evidence. Physiotherapy strategies for assessment and treatment address structural & functional impairments and activity limitations of individuals and population (both adults & paediatric) in the context of their personal needs/goals including participation restrictions and the environment they live in. The permanence of many neurological impairments mandates that, where possible, emphasis is placed on prognosis and criterion – referenced outcomes to establish realistic goals.

The therapeutic approach is patient and family focused with a biopsychosocial emphasis that embraces inter professional collaboration and requires ongoing communication, education and negotiation with the client, family, care giver and healthcare team.

Sr.	Topics	Didactic	Practical	Total
No.		Hours	Hours	Hours
1.	APPLICATION OF ICF MODEL	02		002

	B. PAEDIATRIC	17	040	057
	TOTAL	65	135	200

OBJECTIVES:

At the end of the course, student will

Cognitive:

- a) Be able to identify and analyze movement dysfunction due to neuromuscular skeletal disorders in terms of biomechanical and biophysical basis, correlate the same with the health condition, routine electrophysiological, radiological and biochemical investigations, and arrive at appropriate physical therapy diagnosis using WHO-ICF with clinical reasoning.
- b) Be able to plan realistic goals based on the knowledge of prognosis of the disease of the nervous system and prescribe appropriate, safe evidence based physiotherapy interventions with clinical reasoning.
- c) Understand infection control principles, best practices and techniques applicable to a range of setting where clients with neurological conditions would receive physiotherapy services.
- d) Know determinacy of health (environmental, nutritional, self-management/behavioral factors) and chronic disease management principles related to neurological health.

Psychomotor:

- a) Be able to develop psychomotor skills to implement timely and appropriate physiotherapy assessment tools/techniques to ensure a holistic approach to patient evaluation in order to prioritize patient's problems.
- b) Be able to select timely physiotherapeutic interventions to reduce morbidity and physiotherapy management strategies, suitable for the patients' problems and indicator conditions based on the best available evidence.
- c) Implement appropriate neuro-physiotherapeutic approaches, electrotherapeutic modalities, joint and soft tissue mobilizations and ergonomic advice for neuromuscular skeletal systems, contextual factors to enhance performance of activities and participation in society.

Affective:

a) Be able to develop behavioral skills and humanitarian approach while communicating with patients, relatives, society and co-professionals, to promote individual and community health.

SYLLABUS

Sr. No.	Topics	Didactic Hours	Practical Hours	Total Hour
1.	Features of ICF model (bio, psycho and social) to plan efficient, effective and cost-contained short term and long term goals to enhance functioning in a patient with health condition of nervous system.	02		02
	 a. Clinical utility of bi-directional relationships among the ICF model's domain b. Environment and Personal factors-Facilitators and Barriers that affect disablement and functioning c. Capacity and Performance related Activities and Participation to enhance Functioning d. Set patient specific goals and expected outcome with clinical reasoning e. Documentation of disability and functioning Red flags-recognizing signs and symptoms 			
2.	Theoretical basis of motor control and learning to understand various neurophysiotherapeutic approaches.	02		02
3.	 a. Plasticity of the intact brain i. motor learning ii. training iii. plasticity Plasticity following brain lesion 	01		01
	 nature of spontaneous recovery effect of environment behavior and 	02		02
	recovery	02		02
4.	Quality of Life scales & Independence Measures	02		02

home and in community on the basis of:

- 1. Evaluation, interpretation of investigations and appropriate clinical reasoning for Functional diagnosis (I.C.F.).
- 2. Evidence-based analysis of tools and techniques, (including Quality of Life questionnaires), and planning, prescription & implementation of short term & long term goals of Physiotherapy with appropriate documentation of the same.
- 3. Manifestation of movement dysfunction following disease or trauma of the central or peripheral nervous system.
 - a. Bed mobility
 - b. lying to sitting
 - c. standing up and sitting down
 - d. walking
 - e. balance
 - f. reaching
 - g. manipulation
- 4. Selecting appropriate assessment/evaluation tools and techniques suitable for the patients health condition and key indicators and interpret information obtained demonstrating evidence based decision making-use of biomechanical measures, generic scales/instruments to measure arousal, cognition, sensation, tone, strength, locomotion and balance, upper extremity function, anxiety and depression, quality of life and independence, Self assessment and self efficacy scales and common disease specific scales.
 - GCS
 - Mini Mental State Examination
 - Ashworth scale
 - Gait-D.G.I.
 - Balance- BBS, Functional Arm Reach Test.
 - T.U.G.
 - Barthel A.D.L. index
 - \bullet SF -36
 - Disease specific measures S.T.R.E.A.M., Brunnstrom, Fugl–Meyer assessment. A.S.I.A. Scale, U.P.D.R.S., E.D.S.S.

5 PHYSIOTHERAPY MANAGEMENT – ADULT

Planning of short term and long term goals in accordance with ICF for all the conditions in neurosciences by doing detail assessment and appropriate outcome measures and planning evidence based treatment program-for key indicator conditions

	Topic	Didactic Hours	Practical/ Lab Hours	Total Hours
a.	Stroke – cerebral circulation, types of stroke and manifestations, assessment and	08	10	18
	management			

b. Acquired brain injury; trauma and p (S.O.L.)	oathology 03	05	08
c. Spinal cord disorders – traumatic ar traumatic, management including b training		08	12
d. Peripheral neuropathies – traumatic traumatic - upper limb & lower limb - brachial plexus - nerve root lesions - metabolic & endocrine	& non 06	08	14
e. Vestibular disorders – central and po	eripheral 02	05	07
f. VII th cranial nerve	01	04	05
g. Demyelinating diseases - Multiple S & G.B. syndrome	Sclerosis 02	05	07
h. Cerebellar diseases and Ataxia	02	10	12
i. Extrapyramidal diseases, with empl Parkinson's disease	nasis on 03	15	18
j. Anterior Horn Cell diseases – hered acquired e.g. M.N.D., P.M.A., S.M. Poliomyelitis	9	05	07
k. Myopathies	02	10	12
1. Disorders of A.N.S. – Horner's synd Hypo/Hypertension, Autonomic Dy		05	06
m. Psychosomatic pain & paralysis	01	05	06

Treatment programme includes:

- 1. Application of appropriate electro-therapeutic modes for relief of pain and functional re-education with clinical reasoning.
- 2. Application of skills as Neurotherapeutic approaches (Brunnstrom, Roods, Bobath, N.D.T., M.R.P., mental imagery, Constraint induced movement therapy, learning transfers), co-ordination and balancing exercise by using techniques based on neurophysiological principles.
- 3. Tools and adaptive equipments used for neuro-rehabilitation like Vestibular balls Tilt boards, Bolsters, Wedges, Graded Benches, Therapeutic mats etc.
- 4. Application of transfer and functional re-education exercise, postural exercise and gait training.
- 5. Bladder and bowel training
- 6. Developing a philosophy for caring
- 7. Prescription for appropriate orthotic devices and fabrication of temporary splints
- 8. Lifting techniques, wheel chair modifications, adaptive devices
- 9. Ergonomic advice for prevention/rehabilitation for the patients as well as for parents/care givers education about handling of patients.

PHYSIOTHERAPY MANAGEMENT – PAEDIATRIC

Knowledge of developmental neurology, plasticity in development, Etiology, Pathophysiology of common neuropaediatric conditions, impairment, clinical reasoning, goal setting & P.T. management. More emphasis should be given on physiotherapy management skills.

CLINICAL

SUPERVISED CLINICAL PRACTICE:

During the supervised clinical practice, student should be able to successfully execute the competencies in assessment, physical diagnosis on ICF basis, plan of care and therapeutic interventions relating to neuromuscular dysfunctions. Student should become familiar with performance of these skills in all settings (inpatient and outpatient) as well as on all types of conditions (surgical, non-surgical, pediatric and geriatric). Student should learn to objectively perform these skills under the supervision of trained physical therapists. Student is required to keep a performance record of all listed competencies during the clinical practice and successfully perform on real patients during the final evaluation of the course.

CLINICAL COMPETENCIES:

A] COMPETENCY IN ASSESMENT AND CLINICAL REASONING:

Student should be able to apply the ICF framework in selecting measurement tools to ensure a holistic approach to evaluation of body structure and function, activities, participation; and select and administer assessment/evaluation tools and techniques suitable for the patient's problems and condition(s) based on the best available evidence and interpret the information obtained demonstrating evidence-based decision-making and safe handling technique such as:

- 1. Risk factor screening (Red flags & Yellow flags).
- 2. Assessment of Neuromuscular dysfunction.
- 3. Interpretation of Radiological, Electrophysiological, Hematological and Biochemical investigations.
- 4. Identification and quantification of environmental and home barriers and facilitators
- 5. Identification and analysis of body mechanics during self-care, home management, work, community, tasks, or leisure activities.
- 6. Identification and analysis of ergonomic performance during work (job/school/play):
- 7. Assessment of Quality of Life through use of appropriate questionnaire and generic or disease-specific scales (nice to know)
- 8. Identification and prioritization of impairments in body functions and structures, and activity limitations and participation restrictions to determine specific body function and structure, and activities and participation towards which the intervention will be directed
- 9. State the evidence (patient/client history, lab diagnostics, tests and measures and scientific literature) to support a clinical decision.
- 10. Determine the predicted level of optimal functioning and the time required to achieve that level.
- 11. Recognize barriers that may impact the achievement of optimal functioning within a predicted time frame and ways to overcome them when possible.

BI COMPETENCY IN DEVELOPING PLAN OF CARE:

Student should be able to:

- 1. Identify patient goals and expectations.
- 2. Design a Plan of Care with measurable, prioritized and time bound functional goals (short-term and long-term)
- 3. Consult patient and/or caregivers to develop a mutual agreement regarding the plan of care.
- 4. Identify indications/ additional needs for consultation with other professionals & appropriate referrals.
- 5. Select the interventions that are safe, realistic and meet the specified functional goals and outcomes in the plan of care: (a) identify precautions and contraindications, (b) provide evidence for patient-centered interventions that are identified and selected, (c) define the specificity of the intervention (time, intensity, duration, and frequency).
- 6. Measure and monitor patient response to intervention and modify elements of the plan of care and goals in response to changing patient/client status, as needed.
- 7. Establish criteria for discharge based on patient goals and current functioning and disability.

C| COMPETENCY IN PHYSIOTHERAPEUTIC INTERVENTION:

Important influences on neuromuscular physiotherapy management choices may include but not limited to:

- 1. Diverse settings of care including critical, acute, long term, rehabilitation, and community care;
- 2. Lifespan issues ranging from the neonatal stage to those associated with aging
- 3. Life style modification for diseases and for prevention.
- 4. Skill of application of physical and electrical agents for relief of acute & chronic pain and swelling.
- 5. Facilitation, re-education and training of muscle strength, endurance & motor control, posture and gait through skillful use of various therapeutic exercise techniques with appropriate therapeutic gymnasium equipment.
- 6. Skill of application of Neurotherapeutic modes of improving neuromuscular strength, endurance, movement control, coordination.
- 7. Functional training in self care, home, work (job, school and play), community and leisure activities

CLINICAL SKILLS:

Learning of facilitatory and inhibitory Neurotherapeutic techniques related to adult and paediatric neurological conditions

- Sensory testing Sensory Re-education
- MMT / voluntary control muscle re-education
- Use of appropriate electrical modalities for muscle reeducation / pain relief
- Management of tone
- Postural assessment & postural correction
- Transfer training
- Functional re-education
- Gait assessment- gait training
- Co-ordination testing & training
- Strategies for balance training
- Fitness training for patients having neurological problems.
- Use of outcome measures & quality of life questionnaire.

<u>Presentation & documentation of 8 cases for patient management using ICF model as following:</u>

(Assessment, Evaluation, Diagnosis, Prognosis, Intervention, Outcome)

- 1) U.M.N. lesion **4** cases: Stroke / S.C.I. / Traumatic brain injury / Degenerative disorders / Demyelinating disorders etc...
- 2) L.M.N. lesion 2 cases: Peripheral nerve injuries / Brachial plexus injury / G.B.S. etc.
- 3) Pediatric neuro-2 cases: C.P. / Myopathies / Meningoceole etc.

RECOMMENDED TEXT BOOKS:

- 1. Cash's Text book for Physio Therapist in Neurological disorders-Jaypee bros.
- 2. Proprioceptive Neuro muscular Facilitation Herman Kabat
- 3. Practical Physical Therapy Margaret Hollis
- 4. Therapeutic exercise O'Sullivan
- 5. "Right in the middle" Patricia Davis
- 6. Stroke rehabilitation Margaret Johnstone
- 7. Paediatric Physiotherapy Roberta Shepherd.

RECOMMENDED REFERENCE BOOKS:

- 1. Neurological rehabilitation Darcy Umphred
- 2. Paediatric physical therapy Stephen Tecklin
- 3. Brain's disorders of Nervous system
- 4. Paediatric Physiotherapy Sophie Levitt
 Neurological Rehabilitation Optimising Motor Performance Carr and Shepherd

SCHEME OF UNIVERSITY EXAMINATION

THEORY				
	80 MARKS + I.A. – 20 MARKS * The question paper will give appropriate weightage to all the topics in the syllabus.			
Section A -M.C.Qs.	Q-1 - MCQs – based on MUST KNOW area [20x 1=20]	20		
Section B- S.A.Q.	Q-2 - Answer any FIVE out of SIX [5 x 3 =15]			
	Q-3- Answer any THREE out of FOUR $[3 \times 5 = 15]$	30		
* Based on topics- structured question based on ICF model with emphasis to goal setting and treatment intervention Q-4] L.A.Q Compulsory U.M.N. condition (adult / paediatric)) - 15 marks Q-5] L.M.N. condition (adult / paediatric) - 15 marks OR Q-5] L.M.N. condition (adult / paediatric) - 15 marks L.A.Q. should give break up of 15 marks e.g. [3 +5+7]		30		
	Total Marks	80		

PRACTICAL		Marks	
80 MARKS + I.A. –	20 MARKS	100	
LONG CASE	 a. Subjective and Physical Examination -10 marks b. Evaluation and Physical therapy diagnosis (ICF) – 10 marks c. Plan of care - Goal setting -10 marks d. Demonstration of any one important test and treatment intervention on patient -15 marks [To be evaluated in cognitive, psychomotor and affective domains.] 	45	
SHORT CASE	One Short case on: Demonstrations of two physiotherapy intervention		
SPOTS 5 spots - (5 x2 Marks= 10 Marks) 3 minutes for each spot E.M.G/N.C. Studies / Orthoses/ Prostheses & Neurological assessment, Scales		10	
JOURNAL	Documentations- Assessment, Evaluation, Diagnosis, Prognosis, Intervention of Case along with I.C.F.	5	
	Total Marks	80	

INTERNAL ASSESSMENT:

- 1. Two exams Terminal and preliminary examination (Theory & Practical) of 80 marks each TOTAL 160 marks
- 2. Internal Assessment to be calculated out of 20 marks.
- 3. In Practicals of Terminal & Preliminary examinations, Spots will be of 15 marks instead of 10 marks (3 marks X 5), No marks will be allotted for the journal in Terminal & Preliminary examinations
- 4. Internal assessment (Theory) as per University pattern.

CARDIO-VASCULAR & RESPIRATORY PHYSIOTHERAPY

(INCLUDING CRITICAL CARE)

(Didactic-60HRS + Clinical 140HRS) TOTAL 200 HRS

COURSE DESCRIPTION:

This course includes a study of applied anatomy and physiology of the Cardiovascular and Respiratory system along with pathological changes and pathomechanics of the system. It discusses relevant tests and measures for determining impairment and differentiating the diagnosis based on the specificity and sensitivity of the assessment instruments as related to patients with disorders of the Cardiovascular and Respiratory system.

Cardiovascular and Respiratory Physiotherapy focuses on maximizing functional independence and well-being. This course uses a patient-centered model of care with multi-system assessment, evidence based interventions and a significant patient education component to promote healthy active lifestyle and community-based living. The candidate will have a sound understanding of theory, scientific evidence and best practices in the areas of the Cardio vascular and Respiratory System including critical care, Psychosocial Sciences, Movement Sciences and Physiotherapy.

Sr. No.	Topics	Didactic Hours	Practical/Lab Hours	Total Hours
1	REVIEW OF BASIC APPLIED	3		3
	ANATOMY & PHYSIOLOGY			
2	INVESTIGATION AND EXERCISE	4	10	14
	TESTING			
3	EXERCISE PHYSIOLOGY	5	10	15
4	PHYSIOTHERAPY SKILLS	8	34	42
5	APPLICATION OF ICF MODEL	2		2
6	PHYSIOTHERAPY MANAGEMENT	20	53	73
7	CARDIAC REHABILITATION	4	10	14
8	PULMONARY REHABILITATION	2	5	7
9	ICU EVALUATION & MANAGEMENT	8	12	20
10	INTRODUCTION TO FUNCTIONAL	2	1	3
	SCALES			
11	BASIC LIFE SUPPORT (C.P.C.R.)	2	5	7
	TOTAL	60	140	200

OBJECTIVES:

At the end of the course, the student will be able to:

Cognitive:

- a. Identify and analyze cardio-vascular & pulmonary dysfunction in terms of bio-mechanical, and Bio-physical basis and correlate the same with the Health condition, routine electrophysiological, radiological, and biochemical investigations and arrive at appropriate Physical therapy diagnosis using WHO-ICF tool (Disability, Functioning and contextual factors) with clinical reasoning.
- b. Plan, prescribe appropriate, safe physiotherapy interventions with clinical reasoning for and prevention of impairments, activity limitations, participation restrictions and environmental barriers related to cardio-vascular & pulmonary dysfunction in acute care settings, at home, work place, in society & in leisure activities.

Psychomotor:

- a. Utilise skills such as executing exercise tests, PFT, Ankle brachial index, arterial & venous insufficiency tests
- b. Utilise psychomotor skills to implement appropriate bronchial hygiene therapy, therapeutic exercise, electrotherapeutic modalities, CPCR, Intensive (critical) care, joint and soft tissue mobilisations, offering ergonomic & energy conservation advice for patients with cardio-vascular & pulmonary dysfunction.
- c. Utilise the knowledge about contextual factors to enhance capacity and performance of activities and participation in society
- d. Utilise the skill to deliver cardiac, pulmonary & vascular rehabilitation

Affective:

- a. Develop behavioral skills and humanitarian approach while communicating with patients, relatives, society at large and co-professionals
- b. Develop bed side behavior, respect & maintain patients' confidentiality

SYLLABUS

Sr. No.	Topics	Didactic Hours	Practical/ Lab Hours	Total Hours
1	REVIEW OF BASIC APPLIED ANATOMY & PHYSIOLOGY	3		3
	 a. Pulmonary Anatomy & Physiology b. Cardiac anatomy & Physiology c. Cardiac and Respiratory Pharmacology d. Biomechanics of Thorax (Revision) 			
2	INVESTIGATION AND EXERCISE TESTING	4	10	14
	 a. Investigation & Clinical Implication - X-ray, PFT,ABG,ECG, ABI, claudication time, pulses, auscultation, postural hypotension b. Stress testing 6 Minute Walk test & Harward Step test Skill & Interpretation Shuttle Walk Test & Modified Bruce Protocol (should be interpretation only) 			
3	EXERCISE PHYSIOLOGY	5	10	15
	 a. Nutrition(Bioenergetics) b. Total energy expenditure (MET) sources c. Acute and chronic adaptation to exercise d. Complication of bed rest/ Immobilization & prevention e. Aerobic & Anaerobic Training, f. Principles of Exercise Prescription 			

Sr. No.	Topics	Didactic Hours	Practical/ Lab Hours	Total Hours
4	PHYSIOTHERAPY SKILLS	8	34	42
	 a. Bronchial Hygiene Therapy- Postural Drainage, Forced Expiratory Technique, ACBT, Autogenic Drainage b. Adjunct Therapy – Flutter & PEP Therapy c. Therapeutic positioning to improve ventilation & perfusion matching, d. Therapeutic positioning to alleviate dyspnoea e. Nebulisation & Humidification, f. Lung Expansion Therapy g. Neurophysiologic facilitation of respiration h. Electrotherapeutic modalities for pain, swelling, &wound healing. i. Therapeutic exercise program to alleviate pain, to achieve mobility, to correct posture and improve peripheral circulation. j. Therapeutic exercise program to strengthen respiratory muscles k. Deliver Ergonomic advice, energy conservation advice, Home exercise Program, & modifications of contextual factors. l. Applied Yoga in Cardio-respiratory conditions 			
5	APPLICATION OF ICF MODEL	2	-	2
	 a. To plan effective Short term and long term goals to enhance functioning of Cardiovascular & Respiratory Dysfunction b. Set patient specific goals and expected outcome within time frame with clinical reasoning c. Documentation

S. No.	PRACTICAL
1	Positioning, breathing control strategies (e.g. Pursed Lip Breathing, Sustained
	Maximal Inspiration, deep breathing), ventilator muscle training. Relaxation training,
	positioning, early mobilization.
2	Airway clearance techniques, Suctioning, use of mechanical assistive devices (e.g.
	Positive Expiratory Pressure, Flutter, Vest, etc.), postural drainage and percussions,
	coughing maneuvers, medication delivery e.g. Nebulization ,oxygen
3	Physical handling Techniques (e.g. positioning and donning, doffing, fitting and
	adjusting Stockings for vascular disorders, bandaging, dressing, taping, splints and
	orthotics pertaining to cardiovascular and pulmonary impairments)
4	PNF for breathing facilitation and inhibition.
5	Ability to use a variety of exercise/movement equipment (e.g. treadmill, heart rate
	monitor, Oximeter, pressure biofeedback unit, free weights, balance boards,
	theraballs, etc)
6	Prescription and education: aerobic, endurance and interval exercise training,
	resistance (strength, Endurance and power) training, flexibility training. Formulating
	cardiac, pulmonary rehabilitation programme
7	Develop skills to monitor compliance of the client in executing rehabilitation
	program & identifying comorbid & contextual factors affecting it.
8	Familiarity and skill of use of various monitoring and treatment equipments in ICU.
9	Use of physical and electrical agents for pain relief and wound care
10	Skill of administering basic life support

CLINICAL COMPETENCIES:

A] COMPETENCY IN ASSESMENT AND CLINICAL REASONING:

Student should be able to apply the ICF framework in selecting measurement tools to ensure a holistic approach to evaluation of body structure and function, activities, participation; and select and administer assessment/evaluation tools and techniques suitable for the patient's problems and condition(s) based on the best available evidence and interpret the information obtained demonstrating evidence-based decision-making and safe handling technique such as:

- 1. Risk factor screening (Red flags & Yellow flags).
- 2. Assessment of Cardiovascular & Respiratory dysfunction.
- 3. Interpretation of Radiological, Haematological and Biochemical investigations.
- 4. Aerobic fitness and Functional performance testing as appropriate
- 5. Identification and quantification of environmental and home barriers and facilitators
- 6. Identification and analysis of body mechanics during self-care, home management, work, community, tasks, or leisure activities.
- 7. Identification and analysis of ergonomic performance during work (job/school/play)
- 8. Assessment of Quality of Life through use of appropriate questionnaire and generic or disease-specific scales (nice to know)
- 9. Identification and prioritization of impairments in body functions and structures, and activity limitations and participation restrictions to determine specific body function and structure, and activities and participation towards which the intervention will be directed.
- 10. State the evidence (patient/client history, lab diagnostics, tests and measures and scientific literature) to support a clinical decision.
- 11. Determine the predicted level of optimal functioning and the time required to achieve that level.
- 12. Recognize barriers that may influence the achievement of optimal functioning within a predicted period and devise ways to overcome them when possible.

B] COMPETENCY IN DEVELOPING PLAN OF CARE:

Student should be able to:

- 1. Identify patient goals and expectations.
- 2. Design a Plan of Care with measurable, prioritized and time bound functional goals (short-term and long-term)
- 3. Consult patient and/or caregivers to develop a mutual agreement regarding the plan of care.
- 4. Identify indications/ additional needs for consultation with other professionals & appropriate referrals.
- 5. Select the interventions that are safe, realistic and meet the specified functional goals and outcomes in the plan of care: (a) identify precautions and contraindications, (b) provide evidence for identified and selected patient-centered interventions that are identified and selected, (c) define the specificity of the intervention (time, intensity, duration, and frequency).
- 6. Measure and monitor patient response to intervention and modify elements of the plan of care and goals in response to changing patient/client status, as needed.
- 7. Establish criteria for discharge based on patient goals and current functioning and disability.

C] COMPETENCY IN PHYSIOTHERAPEUTIC INTERVENTION:

Important influences on Cardiovascular & Respiratory physiotherapy management choices may include but not limited to:

- 1. Diverse settings of care including critical, acute, long term, rehabilitation, and community care
- 2. Lifespan issues ranging from the neonatal stage to those associated with aging;
- 3. Life style modification for diseases and for prevention.
- 4. Skill of application of physical and electrical agents for relief of acute & chronic pain and swelling.
- 5. Facilitation, re-education and training of muscle strength, endurance & motor control, posture and gait through skilful use of various therapeutic exercise techniques with appropriate therapeutic gymnasium equipment.
- 6. Skill of application of therapeutic modes of improving cardiovascular & respiratory performance. Functional training in self care, home, work (job, school and play), community and leisure activities

Documentation:

Presentation & Documentation of 8 cases for patient management using ICF Model as following:

(Assessment, Evaluation, Diagnosis, Prognosis, Intervention, Outcome)

- 1. Medical Respiratory condition
- 2. Paediatric respiratory condition
- 3. Thoracic Surgical condition
- 4. Cardiac Medical condition
- 5. Cardiac Surgical condition
- 6. Peripheral vascular disorders
- 7. Burns of Head, Neck & Face (Acute phase only)
- 8. Abdominal surgical condition

RECOMMENDED TEXT BOOKS

- 1. Cash's Textbook for Physiotherapists in Chest, Heart & Vascular diseases
- 2. Cash's text book in General Medicine & Surgical conditions for Physiotherapists
- 3. Chest Physical therapy & pulmonary rehabilitation -- Donna Frown Filter
- 4. Brompton's hospital guide
- 5. Physiotherapy in respiratory and cardiac problem Pryor and Prasad
- 6. Physiotherapy in Cardio Vascular rehabilitation Webber
- 7. Chest physiotherapy in intensive care Colin Mackenzie
- 8. Mechanical ventilation Ashfaq Hasan
- 9. Management of Mechanical ventilation Pierce

RECOMMENDED REFERENCE BOOKS

- 1. Exercise & the Heart Wenger
- 2. ECG P.J. Mehta
- 3. Cardiopulmonary Physical Therapy -- Irwin Scott
- 4. Fundamental of respiratory care Egan's
- 5. Essential of cardio pulmonary physical therapy Hillgass And Sodosky
- 6. Exercise physiology, energy, nutrition and human performance M'cardle
- 7. Exercise testing and prescription Skinner
- 8. Exercise in health and disease-Pollock

SCHEME OF UNIVERSITY EXAMINATION

THEORY			Marks
80 MARKS + I.A. - 2	20 MARKS		100
* The question paper	will give appropriate weightage to all the topics in	the syllabus.	100
Section A –M.C.Qs.	Q-1 -MCQs – based on MUST KNOW area [20x1=20]	20
Section B- S.A.Q.	Q-2 - Answer any FIVE out of SIX	5 x 3 = 15]	
Section B- Saring.	Q-3- answer any THREE out of FOUR	3 x 5 = 15]	30
	* Based on topics - ICF model.		
	Q-4] L.A.Q	- 15 marks	
	Q-5] (RESPIRATORY SYSTEM)	- 15 marks	30
Section C-L.A.Q.	OR		30
	Q-5] (CARDIO VASCULAR SYSTEM)	- 15 marks	
	L.A.Q. should give break up of 15 marks – e.g.	[3 +5+7]	
	Total Marks		80

PRACTICAL		Marks
80 MARKS + I.A. –	20 MARKS	100
LONG CASE	 a. Subjective and Physical Examination -10 marks b. Evaluation and Physical therapy diagnosis (ICF) – 10 marks c. Plan of care - Goal setting – 10 marks d. Demonstration of any one important test and treatment intervention on patient – 15 marks [Student will be evaluated in cognitive, psychomotor and affective domains.] 	45
SHORT CASE	One Short case on: Demonstrations of two physiotherapy intervention	
SPOTS (5 spots x 2 Marks = 10 Marks) Chest/Cardiac X-ray, ABG, PFT, ECG, Adjunct/devices		
JOURNAL Documentations- Assessment, Evaluation, Diagnosis, Prognosis, Intervention of Case along with ICF		5
	Total Marks	80

INTERNAL ASSESSMENT:

- 1. Two exams Terminal and preliminary examination (Theory & Practical) of 80 marks each TOTAL 160 marks
- 2. Internal Assessment to be calculated out of 20 marks.
- 3. In Practicals of Terminal & Preliminary examinations, Spots will be of 15 marks instead of 10 marks (3 marks X 5). No marks will be allotted for the journal in Terminal & Preliminary examinations.
- 4. Internal assessment (Theory) as per University pattern.

COMMUNITY PHYSIOTHERAPY

(Didactic 85 hrs + Clinical 115 hrs) **TOTAL 200 HRS**

COURSE DESCRIPTION:

Community Physiotherapy describes the roles & responsibilities of the Physiotherapist as an efficient member of the society. This component introduces the Physiotherapist to a proactive preventive oriented philosophy for optimization & betterment of health.

Community Physiotherapy is not apart from the other sections of Physiotherapy described in this syllabus. In fact, it is the in-depth application of these same aspects viz. Musculoskeletal, Neurological & Cardio Vascular & Respiratory to the entire society. This is done by understanding the sections & sub sections of the societies, the national & international health policies, role of Government & Non Government Organizations.

The applications of Community Physiotherapy are not limited to conditions & dysfunctions but as attributed to promotion of Health & rehabilitation in Communities like Elderly, Women, and Occupational Health etc.

Sr. No.	Торіс	Didactic Hours	Clinical Hours	Total Hours
1	HEALTH PROMOTION	10	15	25
2	WOMEN'S HEALTH	20	20	40
3	GERIATRICS HEALTH	20	20	40
4	REHABILITATION	11	20	31

	MANAGEMENT			
6	INDUSTRIAL HEALTH	20	20	40
7	SYNOPSIS	-	20	20
	TOTAL	85	115	200

OBJECTIVES:

At the end of the course the student shall:

Cognitive:

Be able to describe:

- a) The general concepts about health, disease and physical fitness.
- b) Physiology of aging process and its influence on physical fitness.
- c) National policies for the rehabilitation of disabled role of PT.
- d) The strategies to access prevalence and incidence of various conditions responsible for increasing morbidity in the specific community role of PT in reducing morbidity, expected clinical and functional recovery, reasons for non-compliance in specific community environment & solution for the same.
- e) The evaluation of disability and planning for prevention and rehabilitation.
- f) Rehabilitation in urban and rural set up.
- g) Able to be a part of decision making team regarding the policies for the welfare of special communities & on issues of disability

Psychomotor:

- a) Be able to identify with clinical reasoning the prevailing contextual {e.g. environmental and psycho-social cultural} factors, causing high risk responsible for various dysfunctions and morbidity related to sedentary life style and specific community like women, children, aged as well as industrial workers and describe planning strategies of interventional policies to combat such problems at community level.
- b) Be able to gain the ability to collaborate with other health professionals for effective service delivery & community satisfaction
- c) Utilize the research methodology knowledge for formulation of a research question (synopsis)

Affective:

Be an empathetic health professional, especially for those in the community, who is away from the health institutions and having difficulty in healthcare access

	ii. Disability Management: - Acute care,	5		
	Concept of Functional Capacity assessment,			
	Work Conditioning, Work Hardening.			
	iii. Environmental stress in the industrial area	3		
	 accidents due to 			
	a) Physical agents e.g. heat/cold, light, noise,			
	vibration, UV radiation, ionizing radiation.			
	b) Chemical agents- inhalation, local action			
	and ingestion.			
	c) Mechanical hazards-overuse/fatigue			
	injuries due to ergonomic alternation and			
	ergonomic evaluation of work place.			
	iv. Mechanical stresses:	3		
	a) Sedentary table work-executive's clerk.			
	b) Inappropriate seating arrangement-vehicle			
	drivers.			
	c) Constant standing- watchman, defense			
	forces, surgeons.			
	d) Over execution in labourer's-stress			
	management.			
	e) Psychological hazards e.g. monotonicity			
	and dissatisfaction in job, anxiety of work			
	completion with quality, Role of PT. in			
	industrial set up and stress management			
	relaxation modes.			

PROJECT SYNOPSIS

Students have to select a study to be done under the guidance of a teacher of any subject related to physiotherapy. After the finalization of the topic, he/ she has to decide the methodology of the study to be done (which has to be undertaken during the internship) Student will present defend the synopsis of this study to be done during the University Practical examination of Community Physiotherapy.

	CLINICAL - 115 hrs
1	UHC & PHC visits, Industrial Visit, Geriatric Home Visit
2	Institutional adoption of close by area/ vicinity.
3	Perform surveys in adopted localities for ANC, disability, exercises & health promotion,
	preventive aspects for smoking/ alcohol/ drugs in youth etc.
4	Students may make a case dependent evaluation proforma/ questionnaire.

RECOMMENDED TEXT BOOKS

- 1. Physiotherapy in Gynecological & Obstetrical conditions –Mantle
- 2. Therapeutic Exercise Kisner
- 3. Text book of Community Health for Physiotherapists Bhaskar Rao
- 4. Geriatrics Physiotherapy Andrew Guccione
- 5. Industrial Therapy Glenda Key
- 6. Text of Physiotherapy for obstetrics and Gynecology G.B. Madhuri & Pruthvish

RECOMMENDED REFERENCE BOOKS

- 1. Mural K F Ergonomics: Man in his working environment
- 2. Exercise Physiology- Mc'Ardle
- 3. Musculoskeletal Disorders in work place: Principle & Practice- Nordin
- 4. Andersons Pope
- 5. Indian Social Problem Vol 2 G R Madan
- 6. Status of Disabled in India -2000-RCI publication
- 7. Legal Rights of disabled in India- Gautam Bannerjee
- 8. ICF WHO Health Organisation 2001 publication
- 9. Preventive & Social Medicine Park
- 10. Training in the Community for the people with disability Hallender Padmini Mendes
- 11. Disabled Village Children-- David Werner
- 12. Chorin C& M Desai, C Gonsalves, 1999, Women & the Law, Vol. I & II Socio legal Information Centre Mumbai
- 13. Astrand P A Rodahe K- Text book of Work Physiology
- 14. Women's Health Sapsford

SCHEME OF UNIVERSITY EXAMINATION

THEORY		Marks
80 MARKS + I.A. - 2	20 MARKS	100
* The question paper	will give appropriate weightage to all the topics in the syllabus.	100
	Q-1 -MCQs – based on MUST KNOW area [1 x 20]	
Section A-M.C.Qs.	[Rehab - 4, Women's Health- 4, Health Promotion - 4,	20
	Geriatrics - 4, Industrial - 4.]	
Cartion D. C.A.O.	Q-2 - Answer any FIVE out of SIX $[5x 3 = 15]$	
Section B- S.A.Q.	Q-3- Answer any THREE out of FOUR $[3 \times 5 = 15]$	30
Section C-L.A.Q.	* Based on topics - Health Promotion / Women's Health /Geriatrics /Industrial Health. Q-4] L.A.Q - 15 marks Q-5] - 15 marks OR Q-5] - 15 marks LAQ should give break up of 15 marks - e.g. [3 +5+7]	30
	Total Marks	80

PRACTICAL		Marks
80 MARKS + I.A.	- 20 MARKS	100
LONG CASE	Rehabilitation/ Women's Health / Geriatric/ Industrial Health / Health Promotion.	50
PROJECT SYNOPSIS	(Synopsis can be on any topic to be done during Internship project/ monogram (Musculoskeletal, Neurosciences, Cardio Respiratory or Community). [Introduction, Aims & Objectives, Methods & Methodology & Review of Literature Expected]	25
JOURNAL	 1. 1 cases each of Rehabilitation, Health Promotion, Industrial Health, Women's Health & Geriatrics (Total 5 cases only) 2. Documentation of visits (Minimum One) to either Industry, Geriatric Home, Community assessment 	5
	Total Marks	80

INTERNAL ASSESSMENT:

- 1. Two exams Terminal and preliminary examination (Theory & Practical) of 80 marks each TOTAL 160 marks
- 2 Internal Assessment (Theory) as per University pattern.
- 3. A. Practical examination for Terminal examination to be taken with 2 Long Cases of 40 marks each.
 - B. Practical examination for Preliminary examination to be taken with 1 Long Case of 50 marks & Project Synopsis for 30 marks.
- 4. Internal Assessment to be calculated out of 20 marks.

PRINCIPLES OF BIOENGINEERING

(COLLEGE EXAMINATION)

(Didactic 27 hrs + Practical /Laboratory-03 hrs) TOTAL 30 HRS

COURSE DESCRIPTION:

The course is designed to give knowledge & application of biomechanical principles related to Orthotics & Prosthetics. Students will also learn the principles of the prescription & the checkout procedures of aids & appliances as per the physical dysfunction of the person. They will learn to fabricate simple splints.

OBJECTIVES:

At the end of the course, the candidate shall

Cognitive:

- a) Acquire knowledge about biomechanical principles of application of variety of aids & appliances used for ambulation, protection & prevention.
- b) Acquire in brief knowledge about various material used for splints/ Orthoses & prostheses and their selection criteria

Psychomotor:

Acquire the skill of fabrication of simple splints made out of Low cost material

SYLLABUS

Sr. No.	TOPIC	Didactic Hours
1.	Introduction to bioengineering- Classification of Aids & appliances (Splints/ Orthoses for spine, upper & lower limb; Prostheses for Lower limbs & Upper limbs)	1
2.	Biomechanical principles in designing of appliances & assessment; Procedures for static & dynamic alignment of the Orthoses & Prostheses:	26
	a. Introduction to Orthotics, Solid Ankle foot Orthoses (AFO)	1
	b. Articulated AFO, Various Shoe modifications	1
	c. Knee Ankle Foot Orthoses (KAFO)	1
	d. Knee Orthoses (KO)	1
	e. Hip Knee Ankle Foot orthoses (HKAFO), Hip Orthoses (HO)	1

Sr. No.		TOPIC	Didactic Hours
	f.	Fracture Bracing and Flexible Lumbo-sacral Orthoses (LSO) and Thoraco-Lumbo-sacral Orthoses (TLSO)	1
	g.	Rigid TLSOs and Cervical Orthoses (CO)	1
	h.	Orthotic mgmt. of Scoliosis, Milwaukee and low profile scoliosis orthoses, Scheuermann's Kyphosis & Osteoporosis	1
	i.	Orthoses for LBP, Introduction to Upper limb Orthotics and Shoulder orthoses (SO)	1
	j.	Shoulder (SO),Elbow Orthoses (EO) & Wrist Hand Orthoses (WHO)	2
		Introduction to Gait in relation to the use of Orthoses / Prostheses	1
	1.	Prosthetic management of Forefoot amputees	1
-	m.	Prosthetic management of Syme's and hind foot Amputees	1
-	n.	Below Knee Prosthesis & Prosthetic foot pieces	1
-	0.	Alignment of Below Knee Prosthesis and gait deviations	1
	p.	Prosthetic Knees and Knee Disarticulation mgmt.	
-	q.	Above Knee Prosthesis, alignment, gait deviations	1
	r.	AK Checkouts, Prosthetic mgmt. of Hip Disarticulation, hemipelvectomy, Bilateral amputees and Congenital cases	1
	S.	Introduction to Upper Limb Prosthetics, Prosthetic mgmt. of Partial Hand amputees	2
-	t.	Cosmetic Prostheses for all levels of Amputations	1
	u.	Task Specific Prostheses, Prosthetic mgmt. of Wrist Disarticulation, Myoelectric Below Elbow prosthesis	2
	v.	Body Powered Below Elbow Prostheses and it's components	1
	W.	Harnessing in BE	1
	х.	Prosthetic mgmt. of Elbow Disarticulation and Above Elbow Amputation.	1

3.	Project: Temporary splints: To fabricate ONE splint each [to use P.O.P, aluminum strips /sheets /wires rubber bands, Rexin, Orfit,etc]	
	Splinting- Practical Demonstration of the following a) Cock up (dorsal/volar) b) Outrigger, c) Opponence splint d) Anterior and posterior guard splints for gait training, e) Foot drop splint f) Facial splint g) Mallet Finger Splint h) C bar for 1st web space of hand	3

RECOMMENDED REFERENCE BOOKS

- 1. Orthotics in Functional Rehabilitation of Lower limb- Deborah A. Nawoczenski, Marcia E. Epler
- 2. Orthotics —clinical Practice and Rehabilitation Technology- Published by-Churchill Livingstone
- 3. Atlas of Orthotics- Biomechanical principles and application (American Academy of Orthopedic Surgeons)- The C. V. Mosby Company

SCHEME OF COLLEGE EXAMINATION

THEORY ONLY: 50 MARKS			Marks
[There shall be no LAQ in this paper] * The question paper will give appropriate weightage to all the topics in the syllabus.			50
Section A-Q-1	MCQs – based on MUST KNOW area	[20 x1]	20
Section-B-Q-2 & Q3	SAQ-to answer any FIVE out of SIX	[5 x 3]	15
Section-D-Q-2 & Q3	SAQ – to answer any THREE out of FOUR	[3 x 5]	15
Total Marks			50

Passing in the exam is Mandatory

Grades: A + = 75% & above, A = 66 to 74.5%, B + = 55 to 65 %, B = 50 to 54.5%, C = less than 50%.

RESEARCH METHODOLOGY AND BIOSTATISTICS

(COLLEGE EXAMINATION)

[DIDACTIC: 30 HRS]

COURSE DESCRIPTION:

To provide the students with the necessary concepts of statistics to enable them to realize a research project in the field of Physiotherapy. It involves selection of appropriate statistical techniques to address questions of medical and physiotherapeutic relevance; selects and applies appropriate statistical techniques for managing common types of medical / physiotherapeutic data. It uses various software packages for statistical analysis and data management. It interprets the results of statistical analyses and critically evaluates the use of statistics in the medical literature. It communicates effectively with statisticians and the wider medical community, in writing and orally through presentation of results of statistical analyses. It explores current and anticipated developments in medical statistics as applied to physiotherapists. It is designed to teach entry-level physical therapy students the fundamentals of reading and understanding research methods, design, and statistics.

OBJECTIVES:

At the end of the study of this subject the student should be able to:

- 1. Enumerate the steps in Physiotherapy research process.
- 2. Describe the importance & use of biostatistics for research work.
- 3. Acquire skills of reviewing literature, formulating a hypothesis, collecting data, writing research proposal etc.

SYLLABUS

Sr. No.	Topics	Didactic Hours
1	RESEARCH IN PHYSIOTHERAPY	5
	a. Introduction	
	b. Research for Physiotherapist: Why? How? When?	
	c. Research – Definition, concept, purpose, approaches	
	d. Internet sites for Physiotherapists.	
2	RESEARCH FUNDAMENTALS	5
	a. Define measurement	
	b. Measurement framework	
	c. Scales of measurement	
	d. Pilot Study	
	e. Types of variables	
	f. Reliability & Validity	
	g. Drawing Tables, Graphs, Master chart	
G N	m •	Didactic
Sr. No.	Topics	Hours

3	WRITING A RESEARCH PROPOSAL	3
	a. Defining a problem	
	b. Review of Literature	
	c. Formulating a question, Operational Definition	
	d. Inclusion & Exclusion criteria	
	e. Methodology- Forming groups Data collection & method for	
	analysis	
	f. Informed Consent Steps of documentation – Title to Scope of	
	study	
4	RESEARCH ETHICS	2
	a. Importance of Ethics in Research	
	b. Main ethical issues in human subjects' research	
	c. Main ethical principles that govern research with human	
	subjects	
	d. Components of an ethically valid informed consent for	
	research.	
5	OVERVIEW OF STUDY DESIGNS	3
	a. Observational-	
	i. Descriptive-Case study/ series, Cross sectional,	
	Normative, Correlational	
	ii. Analytical; case control, cohort	
	b. Experimental- True & quasi experimental	
6	SAMPLING	3
	a. Random and non-random sampling.	
	b. Various methods of sampling – simple random, stratified,	
	systematic, cluster and multistage. Sampling and non-sampling	
	errors and methods of minimizing these errors.	
7	BASIC PROBABILITY DISTRIBUTIONS AND SAMPLING	2
	DISTRIBUTIONS	
	a. Concept of probability and probability distribution.	
	b. Normal, Poisson and Binomial distributions, parameters and	
	application.	
	c. Concept of sampling distributions.	
	d. Standard error and confidence intervals.	
	e. Skewness and Kurtosis	

Sr. No.	Topics	Didactic Hours
8	TESTS OF SIGNIFICANCE	3
	 a. Basics of testing of hypothesis – Null and alternate hypothesis, type I and type II errors, level of significance and power of the test, p value. b. Tests of significance (parametric) - t – test (paired and unpaired), Chi square test and test of proportion, one way analysis of variance. c. Repeated measures analysis of variance. d. Tests of significance (non-parametric)-Mann-Whitney u test, Wilcoxon test, e. Kruskal-Wallis analysis of variance. Friedman's analysis of 	
	variance.	
9	CORRELATION AND REGRESSION	1
	Simple correlation – Pearson's and Spearman's; testing the significance of correlation coefficient, linear and multiple regressions.	
10	STATISTICAL DATA	2
	Tabulation, Calculation of central tendency and dispersion, Using software packages, Analysis, Presentation of data in diagrammatic & Graphic form	
11	RESEARCH REPORT	1
	Overview, Types and Publication	

RECOMMENDED TEXT BOOK

- 1. Methods in Biostatistics B.K. Mahajan
- 2. Research for physiotherapist-Hicks

Maharashtra University of Health Sciences, Nashik

Ordinance & Regulations relating to the Degree Course in Master of Physiotherapy (M.P.Th.)

Revised Syllabus

(Applicable from Academic Year 2012-13)

1

Aim

The Master of Physiotherapy (specialty) Programme is directed towards rendering training in Specialty Clinical fields to enhance professional competence in order to fulfill requirement for Physiotherapy Education and Practice.

Specialties offered

- 1. Musculoskeletal Physiotherapy
- 2. Neurophysiotherapy
- 3. Cardiovascular and Respiratory Physiotherapy
- 4. Community Physiotherapy

Duration:

Master of Physiotherapy (specialty) shall be a full time course with duration of **three** academic years.

Eligibility:

Every candidate for admission to the course for the degree of Master of Physiotherapy (specialty) should have the Bachelor degree in Physiotherapy of the University or a degree of another University recognized as equivalent thereto.

Eligibility for appearing for the Exam:

Every candidate presenting himself/herself for the examination for the first time shall submit, at least six months prior to the university examination, the four written copies of a dissertation not less than 2500 words consisting of the result of his/her own study carried out under the guidance of a recognized post graduate teacher together with review of recent advances pertinent to that theme. The acceptance of the dissertation by the examiners shall be a condition precedent to the admission of the candidate for the written & clinical (practical) examination. Dissertation should be based on the specialty subject. A candidate who has submitted his/her dissertation once will not be required to submit a fresh dissertation if he/she re-appears for the examination in the same branch on a subsequent occasion, provided that the examiners have accepted the dissertation.

The Examination for degree of Master of Physiotherapy (specialty) shall be held at the end of three academic years.

The Degree of Masters of Physiotherapy (specialty) shall not be conferred upon a candidate unless he/she has passed in the written, clinical (including viva voice) and the dissertation prescribed for the examination in accordance with the provision.

Goal of the M.P.Th (Specialty) Programme:

The goal of training of post- graduate candidate in the respective specialty is to enable him / her to function as a consultant in the respective physiotherapy specialty. This requires a thorough knowledge of the fundamental and recent advances. He/she should be able to make logical / clinical

decisions regarding patient management & adopt interventions of choice independently. During this period, he/she will be expected to acquire skills in teaching technology & gain experience in research methodology. He/she should practice Physiotherapy in respective Specialty, maintaining the highest regards for ethical aspects.

The programme shall focus on clinical reasoning, problem solving and measurement of treatment outcome, emphasizing on the recent diagnostic & therapeutic trends in the concerned specialty.

On successful completion of M.P.Th. programme, the Physiotherapist professional will be able to take up teaching assignments independently for undergraduate teaching programme. He / She will be able to prepare project proposal with selected research design and interpret the evaluated outcome measures (using sound data processing techniques and statistical methods). She will be able to practice in his / her specialty area with advanced knowledge and skills.

Objectives of the Programme: -

At the end of the course, the candidate shall be able to:

- Acquire in-depth knowledge of structure and function of human body related to the respective branch of specialty.
- Acquire the in-depth knowledge of movement dysfunction of human body, cause thereof, & of principles underlying the use of physiotherapeutic interventions, for restoring movement dysfunction towards normalcy.
- ➤ Demonstrate ability to critically appraise recent physiotherapeutic and related literature from journals & adopt diagnostic & therapeutic procedures based on it.
- > Demonstrate skill in Physical & Functional diagnosis pertaining to patient under care.
- Demonstrate ability to make clinical decision (based on evaluation) regarding Physiotherapy strategy techniques and select appropriate outcome measures based on the comprehensive knowledge of specialty.
- > Demonstrate an expertise in evidence-based skill in the management disorders including movement dysfunction in concerned specialty.
- > Demonstrate an expertise in health promotion, early identification and intervention for quality restoration of function.
- Planning and implementation of treatment programme adequately and appropriately for all clinical conditions common as well as rare related to respective specialty in acute and chronic stage, in intensive care, indoor, outdoor and institutional care, independent practice, on fields of sports and community and during disaster situations.
- > Demonstrate proficiency in creating awareness using newer technology, at various levels in community for healthcare & professional awareness.
- Demonstrate proficiency in planning and executing Physiotherapy services.
- > Demonstrate leadership, managerial, administrative & communication skills.
- Demonstrate the knowledge of legislation applicable to compensation for functional disability, welfare schemes & rights of the disabled, laws related to industrial workers & disabled & appropriate certification.
- > Demonstrate proficiency in classroom and clinical teaching using newer and appropriate technology.
- > Demonstrate proficiency in conducting a professional scientific research, documentations & presentations at various levels.

M.P.Th. (Musculoskeletal Physiotherapy)

The programme shall focus on application of following advances in Physiotherapy theory and practice

PAPER I :- Applied Physiotherapeutic – (Part I)

- 1) Principles of exercise physiology in health and disease
- 2) Basis and Biomechanics of posture and movement patterns and Gait analysis
- 3) Biomechanical, Neuro-anatomical and Neuro-physiological basis of Therapeutic Exercises.
- 4) Fitness and Health Promotion
 - Definition of Health, Fitness and Quality of Life
 - Nutrition and fitness in normal of various ages, women, children, elderly and sports
 - Application of Diet and fitness in case of PWD (Person with disability) due to musculoskeletal disease
 - Application of principles of exercise physiology in management of movement dysfunction in illness or disease in special populations e.g. the central neural vs. peripheral limitations to exercise or occupation-related performance in individuals with disease and dysfunction.
- 5) Research Methodology and Biostatistics
 - Basic concept of research
 - > Definition and scope principles of measurement
 - > Research design reliability
 - Research problems validity
 - Sampling techniques
 - > Data collection
 - Types of studies

Case Control – prospective – survey – cross-sectional – retrospective – single case design – cohort – longitudinal – descriptive research – correlational – clinical – experimental design – sequential clinical design Hypothesis testing

- Statistics
 - Types of data
 - Measures of average, median, frequency and dispersion
 - Correlation and regression
 - Test of significance
 - Parametric and non-parametric test
 - Gaussian Curve
 - Standard deviation
 - > Data management
- Scientific Communication
- Writing a research proposal, reporting the results and evaluation
- > Introduction to computer-data communication, search engines, websites, MeSH
- > literature search
- Evaluating evidence
- Critical appraisal of article, systematic reviews and meta-analysis

PAPER II:- Appied Physiotherapeutics- (Part II)

- 1) Principles and rationale of Neuro-therapeutic skills of management, and neuro-physiological approaches
- 2) Electrodiagnosis and Electrophysiological investigation
- 3) Growth, Development and Aging of the musculoskeletal system
- 4) Scales for evaluation of Quality of life and musculoskeletal disability.
- 5) Recent Functional Diagnostic Procedures & various Outcome Measures
- 6) Education Formal and non-formal Philosophy of health education, curricular planning. Teaching technology teaching learning methods, interactive learning, methods to facilitate learning, use of audio-visual aids, clinical teaching, methods of assessment of student competencies
- 7) Ethics in Physiotherapy practice and research, code of conduct for safe disciplined practice legal aspect, Rights and responsibility of physiotherapist and client, PWD Act Rules and regulations governing physiotherapy practice- National & International.
- 8) Administration -
 - Physiotherapy Management in Hospital, community & Industry.
 - Principles of management, planning, organization, budget, policy procedures and quality assurance.
 - Communication skills, leadership quality & teamwork
 - Importance of documentation, types of documentation systems, documentation of professional assessment including International Classification of Functioning Disability and Health (ICF) format.

PAPER III: Advances in Musculoskeletal Physiotherapy – (Part I)

(Musculo-skeletal Dysfunctions of the Upper Quadrant)

(Upper Quadrant includes occiput, cervical spine, thoracic spine, shoulder girdle and upper extremities)

- 1. Anatomical, Physiological and Biomechanical basis for assessment of movement dysfunctions of the upper quadrant
- 2. Pathophysiological and Pathomechanical basis for management of movement dysfunctions of the upper quadrant
- 3. Clinical decision making skills in evaluation & management of all pediatric, adult and geriatric dysfunctions of the upper quadrant
- 4. Advances in functional diagnostic procedures & various outcome measures relevant to musculo-skeletal dysfunctions of the upper quadrant
- 5. Pathobiological mechanisms of pain; Recent advances in pain evaluation and management
- 6. Advances in the field of Manual Therapy
- 7. Principles of musculo-skeletal health and performance related fitness and Physiotherapeutic management of musculo-skeletal injuries & dysfunctions in various sports
- 8. Principles of assessment of industrial fitness and assessment & management of musculoskeletal dysfunctions related to various industries.
- 9. Ergonomics in Musculo-skeletal dysfunction of the upper quadrant
- 10. Assistive technology used for stability and mobility to enhance function.
- 11. Evidence based practice to formulate effective assessment and treatment program
- 12. Evaluation of disability
- 13. Legislation and social care.
- 14. Assessment, clinical reasoning and management of Integumentary impairments due to musculoskeletal dysfunction
- 15. Pharmacotherapeutics in musculoskeletal conditions and its relevance in physiotherapy
- 16. Clinical decisions for lower quadrant function in presence of upper quadrant dysfunction-

PAPER IV: Advances in Musculoskeletal Physiotherapy –(Part II)

(Musculo-skeletal Dysfunctions of the Lower Quadrant) (Lower Quadrant includes lumbar spine, sacrum, pelvis and lower extremities)

- 1. Anatomical, Physiological and biomechanical basis for assessment of movement dysfunctions of the lower quadrant
- 2. Pathophysiological and Pathomechanical basis for management of movement dysfunctions of the lower quadrant
- 3. Clinical decision making skills in evaluation & management of all pediatric, adult and geriatric dysfunctions of of the lower quadrant
- 4. Advances in functional diagnostic procedures & various outcome measures relevant to musculo-skeletal dysfunctions of the lower quadrant
- 5. Pathobiological mechanisms of pain; Recent advances in pain evaluation and management
- 6. Advances in the field of Manual Therapy
- 7. Principles of musculo-skeletal health and performance related fitness and Physiotherapeutic management of musculo-skeletal injuries & dysfunctions in various sports
- 8. Principles of assessment of industrial fitness and assessment & management of musculoskeletal dysfunctions related to various industries.
- 9. Ergonomics in Musculo-skeletal dysfunction of the lower quadrant
- 10. Assistive technology used for stability and mobility to enhance function.
- 11. Assistive technology used for stability and mobility to enhance function.
- 12. Evidence based practice to formulate effective assessment and treatment program
- 13. Evaluation of disability
- 14. Legislation and social care.
- 15. Assessment and management of Integumentary impairments due to musculoskeletal dysfunction.
- 16. Clinical decisions for upper quadrant function in presence of lower quadrant dysfunction

X	(

CLINICAL POSTING

Academic Year	Posting – Indoor and Outdoor (In Rotation)
First Year	General Medical, General Surgical, Cardiovascular and respiratory,
	Neurology, Intensive Care Units
Second & Third year	Acute care & Rehabilitation in Musculoskeletal dysfunctions: Indoor
(Specialty area)	and Outdoor patients

M.P.Th. (Neurophysiotherapy)

PAPER I: Applied Physiotherapeutics- (Part I)

- 1) Manual Medicine and Therapeutic Exercise
 - Principles of mobilization
 - Soft tissue mobilization
 - Types of techniques
 - Rationale of choice for therapeutic use in neuromusculoskeletal dysfunction
- 2) Clinical Biomechanics: Kinetics and kinematics of normal movement and posture, and its alteration in disease and neuromusculoskeletal dysfunction.
- 3) Analysis of gait motion and it's deviation in neuromusculoskeletal dysfunction
- 4) Application of principles of ergonomics and bioengineering in neuromusculoskeletal dysfunction.
- 5) Fitness and Health Promotion
 - Definition of Health, Fitness and Quality of Life
 - Nutrition and fitness in normal of various ages, women, children, elderly and sports
 - Application of Diet and fitness in case of PWD (Person with disability) due to neuromuscular disease.
 - Application of principles of exercise physiology in management of movement dysfunction, in illness or disease, in special populations e.g. the central neural v/s peripheral limitations, to exercise or occupation-related performance in individuals with disease and dysfunction.
- 6) Research Methodology and Biostatistics
 - Basic concept of research
 - Definition and scope principles of measurement
 - Research design reliability
 - Research problems validity
 - Sampling techniques
 - > Data collection
 - > Hypothesis testing
 - Types of studies

Case Control – prospective – survey – cross-sectional – retrospective – single case design – cohort – longitudinal – descriptive research – correlational – clinical – experimental design – sequential clinical design

- Statistics
 - Types of data
 - Measures of average, median, frequency and dispersion
 - Correlation and regression
 - Test of significance
 - Parametric and non-parametric test
 - Gaussian Curve
 - Standard deviation
 - Data management
- Scientific Communication
 - Writing a research proposal, reporting the results and evaluation
 - Introduction to computer- data communication, search engines, websites, MeSH
 - Literature Search
 - Evaluating Evidence
 - Critical appraisal of article, systematic reviews, meta-analysis

PAPER II: Applied Physiotherapeutics- (Part II)

- 1. Applied Neuro-anatomy and neurophysiology
- 2. Principles and rationale of Neuro-therapeutic skills of management, neurodevelopmental and neurophysiological approaches
- 3. Growth, Development and Aging of neuromusculoskeletal system
- 4. Advanced Electrotherapeutics including Electrodiagnosis
- 5. Scales for evaluation of Quality of Life and neurological disability.
- 6. Education Formal and non-formal Philosophy of health education, curricular planning. Teaching technology teaching learning methods, interactive learning, methods to facilitate learning, use of audio-visual aids, clinical teaching.
- 7. Ethics in Physiotherapy practice and research, code of conduct for safe disciplined practice legal aspect, Rights and responsibility of physiotherapist and client, PWD Act, Rules and regulations governing physiotherapy practice- National & International
- 8. Administration -
 - Physiotherapy Management in Hospital, community & Industry.
 - Principles of management, planning, organisation, budget, policy procedures and quality assurance.
 - Communication skills, leadership quality & teamwork
 - Marketing health and wellness
 - Importance of documentation, types of documentation systems, documentation of professional assessment including International Classification of Functioning Disability and Health (ICF) format.

 X

PAPER III: Advances in Neurophysiotherapy - (Part I)

This paper will focus on advances in theory and practices in paediatric neurological conditions

- Gross and fine motor development skills, posture and gait examination and functional performance
- 2. Facilitation of development using appropriate skills in a neurologically disabled child
- 3. Congenital and acquired disorders affecting growth and development of child
- 4. Advanced skills in assessment of paediatric neuropathological, neuropsychological and neurosurgical conditions
- 5. Advanced Physiotherapy approaches Neurophysiological principles, skills of handling in various approaches and rationale for effective management.
- 6. Clinical decision making and evidence based practice to formulate effective assessment and treatment program
- 7. Theories of motor control and learning, perceptuomotor and sensory issues in children
- 8. Early identification of paediatric neurological disorders and early intervention skill.
- Role of Physiotherapy in progressive paediatric neurological conditions, management of terminally ill child
- 10. Role of Physiotherapy in-Neonatal intensive care units
- 11. Social integration of child in school and community measures to ensure attitudinal, environmental, manpower, assistive technology, legislation and support
- 12. Assessment, clinical reasoning and management, of Integumentary and other system impairments due to neuromusculoskeletal dysfunction.
- 13. Pharmacotherapeutics in neurological conditions and its relevance in physiotherapy

PAPER IV: Advances in Neurophysiotherapy (Part II)

This paper will focus on advances in theory and practices in adult neurological conditions

- 1. Neurodevelopmental and neurophysiological approaches in Adult neurological conditions
- 2. Advance skills in assessment of adult neuro-pathological, neuropsychological and neurosurgical conditions
- 3. Various outcome measures and assessment methods used in geriatric & adult neurological conditions
- 4. Clinical decision making and evidence based practice to formulate effective assessment and treatment program
- 5. Advanced Neuro-therapeutic skills for management
- 6. Role of Physiotherapy in progressive neurological conditions, management of terminally ill patient.
- 7. Facilitation and coping up with problems associated with ageing.
- Prevention of age related complications
 Social integration in community measures to ensure attitudinal, environmental, manpower, assistive technology, legislation and support
- 9. Pharmacotherapeutics in neurological conditions and its relevance in physiotherapy

 X

CLINICAL POSTING

Academic Year	Posting – Indoor and Outdoor (In Rotation)			
First Year	General Medical/ General Surgical/ Musculoskeletal			
	(indoor and OPD)/cardiovascular and respiratoy (indoor			
	and O.P.D/ intensive care units			
Second & Third	Neonatal and Acute care and Rehabilitation of			
year	neuromedical and surgical disorders:			
(Specialty area)	Adult Neuro-medical, neurosurgical and OPD,			
	Pediatrics Neuro-medical, neurosurgical and OPD,			
	Early intervention,			

M.P.Th. Cardiovascular and Respiratory Physiotherapy)

PAPER I: Applied Physiotherapeutics- (Part I)

- 1) Structure and function of Cardiovascular & Respiratory system Changes occurring with, development, growth and ageing
- 2) Impairments of Cardiovascular and Respiratory system from cell to system with clinical reasoning.
- 3) Applied Biomechanics:
 - kinetics and kinematics of Respiration and its alteration with disease and dysfunction.
 - -Dynamics of circulation and its alteration in disease
 - Analysis of gait motion along with energy expenditure with various gaits
- 4) Application of principles of bioengineering in various cardiovascular and respiratory dysfunctions.
- 5) Assessment of Physical and functional capacity.
- 6) Manual Medicine and Therapeutic Exercise
 - Principles of mobilization
 - Soft tissue mobilization
 - Types of techniques
 - Rationale of choice for therapeutic use
 - Mobilisations as applied to spine, thorax and ribcage
- 7) Fitness and Health Promotion
 - Definition of Health, Fitness and Quality of Life
 - Principles of exercise physiology in health and disease.
 - Nutrition and fitness in normal of various ages, women, children, elderly and sports
 - Application of Diet and fitness in case of PWD (Person with disability) due to cardiovascular and respiratory disease
 - Application of principles of exercise physiology in movement dysfunction in illness &
 disease in special populations e.g. the central neural vs. peripheral limitations to
 exercise or occupation-related performance in individuals with disease and
 dysfunction.
- 8) Alternative therapies in treating cardiovascular and respiratory dysfuntions
- 9) Research Methodology and Biostatistics
 - Basic concept of research
 - ➤ Definition and scope principles of measurement
 - > Research design reliability
 - > Research problems validity
 - > Sampling techniques
 - Data collection
 - Hypothesis Testing
 - Types of studies

Case Control – prospective – survey – cross-sectional – retrospective – single case design – cohort – longitudinal – descriptive research – correlational – clinical – experimental design – sequential clinical design

- Statistics
 - > Types of data
 - ➤ Measures of average, median, frequency and dispersion
 - > Correlation and regression
 - > Test of significance
 - ➤ Parametric and non-parametric test
 - Gaussian Curve
 - > Standard deviation
 - Data management

- Scientific Communication
 - > Writing a research proposal, reporting the results and evaluation Introduction to computer-data communication, search engines, websites, MeSH
 - Literature Search
 - > Evaluating evidence
 - > Critical appraisal of article, systematic reviews and meta-analysis

-----X------X

PAPER II: Appied Physiotherapeutics- (Part II)

- 1)Principles and rationale of Neuro-therapeutic skills of management, neurodevelopmental and neurophysiological approaches
- 2) Advanced Electrotherapeutics and electrodiagnosis
- 3) Scales for evaluation of quality of life in patients with cardiovascular and respiratory dysfunction.
- 4) Evaluation of disability with cardiovascular and respiratory dysfunction.
- 6) Education Formal and non-formal Philosophy of health education, curricular planning. Teaching technology teaching learning methods, interactive learning, methods to facilitate learning, use of audio-visual aids, clinical teaching
- 7) Ethics in Physiotherapy practice, clinical and research, code of conduct for safe disciplined practice legal aspect, Rights and responsibility of physiotherapist and client, PWD Act .Rules and regulations governing physiotherapy practice- National & International
- 8) Administration -
 - Physiotherapy Management in Hospital, community & Industry.
 - Principles of management, planning, organisation, budget, policy procedures and quality assurance.
 - Communication skills, leadership quality & teamwork
 - Importance of documentation, types of documentation systems, documentation of professional assessment including International Classification of Functioning Disability and Health (ICF) format.

X	/

9) Disability evaluation, legislation, certification and social care

PAPER III: Advances in Cardiovascular and Respiratory Physiotherapy (Part I). (Respiratory Physiotherapy)

- 1. Structural, functional and Biomechanical basis for assessment and management of dysfunctions of the respiratory system and thorax throughout the life span.
- 2. Clinical reasoning in physiotherapeutic evaluation & management of all neonatal ,pediatric, adult and geriatric dysfunctions of the respiratory system and thorax in acute care and in rehabilitation
- 3. Advances in functional diagnostic procedures & various outcome measures relevant to assess intervention to dysfunctions of thorax and respiratory system.
- 4. Interpretation and application of Investigations related to Respiratory and thoracic dysfunction and its relevance to physiotherapy
- 5. Evidence based practice in management of Respiratory & Thoracic impairments & dysfunction.
- 6. Pulmonary rehabilitation
- 7. Ergonomics and energy conservation in Respiratory dysfunction and use of assistive devices to enhance function and performance.
- 8. Pathology of pain in medical and Post-surgical conditions related to thoracorespiratory dysfunction and advances in its evaluation and management
- Clinical decision making and evidence based practice in physiotherapeutic evaluation & management of all medical, surgical and traumatic disorders across the life span in a critical care (ICU) setting
- 10. Management of the critically ill: knowledge of Airways -types & management Mechanical ventilator, use of Oxygen therapy; Physiotherapeutic Interventions in intensive care ,weaning and ICU monitoring.
- 11. Postoperative respiratory care
- 12. Principles of health and performance, Risk stratification, Prevention and health promotion
- 13. Pharmacotherapeutics in respiratory condition and its relevance with physiotherapy

PAPER IV: Cardiovascular and Respiratory Physiotherapy (Part II)

(Cardiovascular Physiotherapy)

- 1. Structural and functional and Biomechanical basis for assessment and management of dysfunctions of the circulatory system including peripheral vessels and mediastinum throughout the life span.
- 2. Clinical decision making skills in physiotherapeutic evaluation & management of all neonatal pediatric, adult and geriatric dysfunctions of the cardiovascular including peripheral vasculature system and mediastinum in acute care and rehabilitation
- 3. Advances in functional diagnostic procedures & various outcome measures relevant to assess intervention to dysfunctions of cardiovascular and peripheral vascular system.
- 4. Evidence based practice in assessment and management of cardiovascular and peripheral vascular dysfunction and failure
- 5. Ergonomics and energy conservation in cardiovascular dysfunction and use of assistive devices to enhance function and performance.
- 6. Pathology of pain in medical and surgical impairments related to cardiovascular dysfunction and advances in its evaluation and management
- 7. Clinical decision-making skills in physiotherapeutic evaluation & management of all medical, surgical and traumatic conditions across the life span in a critical care (ICU) setting
- 8. Management of the critically ill: knowledge of Airways -types & management Mechanical ventilator, use of Oxygen therapy; Physiotherapeutic Interventions in intensive care, weaning and ICU monitoring
- 9. Postoperative respiratory care
- 10. Cardiac Rehabilitation
- 11. Vascular rehabilitation
- 12. Principles of health and performance, Risk stratification, Prevention and health promotion
- 13. Interpretation and application of Investigations related to Respiratory, cardiac and thoracic dysfunction and its relevance to physiotherapy.
- 14. Pharmacotherapeutics in cardiac condition and its relevance with physiotherapy.
- 15. Clinical decision-making skills in physiotherapeutic evaluation & management of Lifestyle disorders.
- 16. Cardio-Respiratory fitness testing and training in sports and diseases
- 17. Knowledge and skill of basic life support
- 18. Clinical reasoning, assessment and management of Integumentary and other system impairments due to cardiovascular and respiratory diseases

CLINICAL POSTING

Academic Year	Posting – Indoor and Outdoor (In Rotation)			
First Year	General Medical, General Surgical wards, Orthopaedic (indoor			
	and Outdoor), neurology(indoor & Outdoor)			
Second & Third	Acute care & Rehabilitation in Cardiovascularthoracic &			
year	Respiratory dysfunctions:			
(Specialty area)	Intensive care units, Cardiovascular, thoracic & Respiratory,			
	(indoor & OPD)			

M.P.Th. (Community Physiotherapy)

PAPER I: Allied Physiotherapeutics- (Part I)

- 1) Epidemiology
- 2) Manual Medicine and Therapeutic Exercise
 - Principles of mobilization
 - Soft tissue mobilization
 - Types of techniques
 - Rationale of choice for therapeutic use
- 3) Clinical Biomechanics and Bioengineering
- 4) Fitness and Health Promotion
- · Definition of Health, Fitness and Quality of Life
- Nutrition and fitness in normal of various ages, women, children, elderly and sports
- Application of Diet and fitness in case of PWD (Person with disability) due to disease
- Application of principles of exercise physiology in management of movement dysfunction in illness or disease in special populations e.g. the central neural v/s peripheral limitations to exercise or occupation-related performance in individuals with disease and dysfunction.
- 5) Research Methodology and Biostatistics
 - Basic concept of research
 - > Definition and scope principles of measurement
 - Research design reliability
 - Research problems validity
 - > Sampling techniques
 - Data collection
 - Types of studies

Case Control – prospective – survey – cross-sectional – retrospective – single case design – cohort – longitudinal – descriptive research – correlational – clinical – experimental design – sequential clinical design

- Statistics
 - Types of data
 - > Measures of average, median, frequency and dispersion
 - Correlation and regression
 - > Test of significance
 - Parametric and non-parametric test
 - Gaussian Curve
 - Standard deviation
 - Data management
- Scientific Communication
- Writing a research proposal, reporting the results and evaluation Introduction to computerdata communication, search engines, websites, MeSH
- Literature search
- Evaluating evidence
- Critical appraisal of article, systematic reviews and meta-analysis

PAPER II: Appied Physiotherapeutics- (Part II)

- 1) Applied Neuro-anatomy and neurophysiology
- 2)Principles and rationale of Neuro-therapeutic skills of management, neurodevelopmental and neurophysiological approaches
- 3) Growth, Development and Aging
- 4) Basis and Biomechanics of postural movement patterns, analysis of gait motion
- 5) Advanced Electrotherapeutics
- 6) Eectrodiagnosis and Electrophysiological investigation
- 7) Assessment scales for impairment / disability / handicap and Quality of Life (Generic and specific)
- 8) Education Formal and non-formal Philosophy of health education, curricular planning. Teaching technology teaching learning methods, interactive learning, methods to facilitate learning, use of audio-visual aids, clinical teaching
- 9) Ethics in Physiotherapy practice, code of conduct for safe disciplined practice legal aspect, Rights and responsibility of physiotherapist and client, PWD Act
- 11) Administration -
 - Ethical issues & legal aspects in practice of physiotherapy- Clinical, Research and Academics. Administration, legislation, Rules and regulations governing physiotherapy practice- National & International.
 - Physiotherapy Management in Hospital, community & Industry.
 - Principles of management, planning, organization, budget, policy procedures and quality assurance.
 - Communication skills, leadership quality & teamwork
 - Importance of documentation, types of documentation systems, documentation of professional assessment including International Classification of Functioning Disability and Health (ICF) format.

PAPER III: Advances in Community Physiotherapy (Part I)

- 1) Health care in the Community Principles & delivery systems
- 2) Principles and practice of fitness training for health promotion in community
- 3) Clinical decision-making skill in assessment & management of dysfunction related to Community health.
- 4) Geriatric health, fitness, & rehabilitation
- 5) Ergonomic considerations, health, fitness, assessment, prevention and management of Injuries with special reference to Home, Industry and workplace
- 6) Occupational Health and related disorders
- 7) Man-machine interaction
- 8) Applied anatomy, physiology and biomechanics related to women's health, maternal & child health
- 9) Early detection of "at risk" babies and early intervention in the community
- 10) Yoga

Paper IV: Advances in Community Physiotherapy (Part II)

- 1) Community Dynamics
- 2) Principles and practice of Rehabilitation and outreach services including domiciliary services
- 3) Advances in disaster management
- 4) Principles and practice of Community Based Rehabilitation
- 5) Physiotherapist as a CBR manager & Master trainer for community health programmes
- 6) Disability Assessment for quantification of extent of disability
- 7) Quality of life and its measures
- 8) Survey
- 9) Evidence Based Practice in Community Health.
- 10) Information, Education and Communication (IEC) for Community Awareness
- 11) Access issues and appropriate interventions
- 12) Appropriate Technology, Assistive devices used for Stability & Mobility to enhance function
- 13) National & International Legislations for PWD and Regulatory Agencies

Clinical Posting:

Academic Year	Posting – Indoor and Outdoor (In Rotation)		
First Year	General Medical, General Surgical, Orthopedic, neurology,		
	cardio respiratory (medical and surgical), OPD, intensive care		
	units etc		
Second and third	Gynaec and Obstetric, antenatal postnatal OPD, geriatric OPD,		
year	PHC/CHC in Rural areas, Urban slums, Industry, Old Age		
(Specialty area)	Homes, Physical Rehabilitation Centers		

Scheme of Examination

Sr. No.	Passing Head	Total Marks	Minimum Marks required for passing
1.	Theory	400	200
2.	Practical including viva voice	400	200
	Total Marks	800 Marks	400 Marks

- i) A Candidate must pass in two heads i.e. Theory and Practical (Clinical including Oral viva), separately at the same time.
- ii) In Theory examination candidate must obtain 50% marks in theory. As far as individual paper is concerned a candidate must obtain minimum 40 Marks in each Theory paper but a candidate should obtain at least 50% marks to pass theory exam.
- iii) In Practical, Candidate must obtain 50% of Total Marks to pass practical examination.

Theory Examination:-

- i. There shall be four Theory Papers of 100 Marks each.
- ii. Each paper shall be of 3 hours duration.
- iii. All questions are compulsory.

Q. No.	Nature of Question	Distribution of Marks	Total Marks
1.	Long Answer Questions	1×30	30 Marks
2.	Long Answer Questions	1×30	30 Marks
3.	Solve any four out of five SAQ	4×10	40 Marks

 In Applied Physiotherapeutics in Paper I and II for all specialties, the topics of research methodology, ethics management and teaching technology will be preferably asked as Short Answer Questions.

Paper wise distribution of topics is as given below:-

Exam Paper No.

Topic/Nomenclature

Paper I Applied Physiotherapeutics – (Part I)

Paper II Applied Physiotherapeutics – (Part II)

Paper III Advances in Specialty (Part I)

Paper IV Advances in Specialty (Part II)

Practical /Clinical Examination: -

It should be aimed for assessing competence of skills of techniques and procedures as well as testing students ability to make relevant and valid observations, interpretations and inferences using laboratory or experimental work relating to his/her subject.

A) PRACTICAL SCHEME: -

Sr. No.	Heading	Marks
1.	Specialty Case 1: -	
	Neurophysiotherapy - Adult Neuro-pathological Condition	
	Musculoskeletal Physiotherapy -	150
	degenerative/inflammatory/infective/congenital/non-traumatic condition	150
	Cardiovascular Respiratory Physiotherapy - Cardiovascular condition	
	Community Physiotherapy – Any case of Physically disabled because of	
	congenital / acquired disorder	
2.	Specialty Case 2: -	
	Neurophysiotherapy - Paediatric Neuro-pathological Condition	150
	Musculoskeletal Physiotherapy - Traumatic condition	
	<u>Cardiovascular Respiratory Physiotherapy</u> - Respiratory condition	
	<u>Community Physiotherapy</u> – Any case based on Geriatric / Women's	
	health / Child care/Industrial set up (preferably evaluated & examined	
	at the site / in the community / at the patient's home or home for	
	the Aged)	
4.	Spots : - (5 spots 5 Marks each).	
	Neurophysiotherapy – e.g. electro diagnosis, orthosis, X-Ray, CT scans	25
	MRI, etc.	
	<u>Musculoskeletal Physiotherapy</u> – e.g. electro diagnosis, orthosis,	
	prosthesis, X-Ray (spine and extremities) etc.	
	<u>Cardiovascular Respiratory Physiotherapy</u> – e.g. pulmonary function	
	test, electro cardiogram, X-Ray, Arterial Blood Gas Analysis, CT scan	
	(Thorax), MRI, (Thorax), etc.	
	Community Physiotherapy - e.g. electro diagnosis, orthosis prosthesis,	
	pulmonary function test, electro cardiogram, X-Ray, Arterial Blood Gas	
	Analysis, CT scan, MRI, etc.	
5.	<u>Viva Voice</u> :- Based on Dissertation	50
6.	Micro Teaching (Teaching of any topic or section in specialty subject)	25
	Total	400

- B) <u>Number Of Candidate</u>: The maximum number of candidate to be examined in Clinical / Practical and oral shall not exceed 8 per batch of two days examination.
- C) Criteria for examiner: All the Post Graduate Examiners shall be recognized Post Graduate Teachers holding recognized Post Graduate qualifications in the subject concerned with minimum 5 yrs P.G. Teaching experience.
- D) Number of Examiners for Practical: -

There shall be four examiners: Two Internal and two external.

Internal 1: - Same centre (Convenor)

Internal 2: - Out side the college within same region.

External 1: - Within MUHS from other region.

External 2: - Outside state, if not available then, outside MUHS jurisdiction within state.

DISSERTATION: -

- 1. Every candidate pursuing M.P.Th degree course is required to carry out work on a selected research project under the guidance of a recognized postgraduate teacher. The results of such a work shall be submitted in the form of a dissertation.
- 2. The dissertation is aimed to train a postgraduate student in research method and techniques. It includes identification of a problem, formation of a hypothesis, search and review of literature, getting acquainted with recent advances, designing of a research study, collection of data, statistical analysis of results, discussion and drawing conclusion.
- 3. Every candidate shall submit to the Registrar of the University in the prescribed proforma, a synopsis containing particulars of proposed dissertation work within six months from the date of commencement of the course or on or before the dates notified by the University. The synopsis shall be sent through the proper channel.
- 4. Such synopsis will be reviewed and the dissertation topic will be registered by the University.
- 5. Thesis Topics will be submitted 6 months after admission.
- 6. The ethics committee (College level) approval is mandatory.
- 7. Thesis (Whole) submitted after 30 months or 6 months before final examination.
- 8. The dissertation should be written under the following headings:
- i. Introduction
- ii. Need for the study
- iii. Aims or Objectives of study
- iv. Review of Literature
- v. Material and Methods
- vi. Results
- vii. Discussion
- viii. Conclusion
- ix. Limitation
- x. Clinical Implication- Suggestion
- xi. Summary
- xii. Tables
- xiii. Annexure

9. The written text of dissertation shall be not less than 50 pages excluding references, tables, questionnaires and other annexure. It should be neatly typed in double line spacing on one side of paper (A4 size, 8.27" x 11.69") and bound properly. Spiral binding should be avoided. The dissertation shall be certified by the guide, head of the department and head of the institution.

10. Five copies of dissertation along with CD (Softcopy) thus prepared shall be submitted to the controller of Examination, six months before final examination on or before the dates notified by the University.

11. The dissertation shall be valued by examiners appointed by the University. Approval of dissertation work is an essential precondition for a candidate to appear in the University examination.

12. Guide: - The academic qualification and teaching experience required for recognition by this University as a guide for dissertation work is as per M.U.H.S rules of PG teachers.

13. Change of guide: - In the event of a registered guide leaving the college for any reason or in the event of death of guide, guide may be changed with prior permission from the university.

14. Thesis shall be examined by a minimum of 3 examiners, (Appointed by University) one internal and Two external who shall be examiners for clinical / practical also.

15. At least two examiners shall approve the same otherwise candidate has to redo the dissertation.

16. Candidate is allowed to appear for the exam only after acceptance of thesis.

17. The presentation and submission of dissertation will be as per the guidelines set by the Controller of Examinations in Notification No 08/2010 (Guidelines for submission of dissertation of MPTh Courses) and or as per notification revised from time to time
